ENFORCEMENT OF CIVIL LIABILITIES

The Company is a Public Limited (Listed) Company under the laws of India and all the Directors and all Executive Officers are residents of India. It may not be possible or may be difficult for investors to affect service of process upon the Company or these other persons outside India or to enforce against them in courts in India, judgments obtained in courts outside India. India is not a party to any international treaty in relation to the automatic recognition or enforcement of foreign judgments.

However, recognition and enforcement of foreign judgments is provided for under Sections 13, 14 and 44A of the Code of Civil Procedure, 1908, as amended (the “**Civil Procedure Code**”). Section 44A of the Civil Procedure Code provides that where a certified copy of a decree of any superior court (within the meaning of that section) in any country or territory outside India which the Government of India has by notification declared to be a reciprocating territory, is filed before a district court in India, such decree may be executed in India as if the decree has been rendered by a district court in India. Section 44A of the Civil Procedure Code is applicable only to monetary decrees or judgments not being in the nature of amounts payable in respect of taxes or other charges of a similar nature or in respect of fines or other penalties. Section 44A of the Civil Procedure Code does not apply to arbitration awards even if such awards are enforceable as a decree or judgment. Among others, the United Kingdom, Singapore, Hong Kong and the United Arab Emirates have been declared by the Government of India to be reciprocating territories within the meaning of Section 44A of the Civil Procedure Code.

The United States has not been declared by the Government of India to be a reciprocating territory for the purposes of Section 44A of the Civil Procedure Code. Under Section 14 of the Civil Procedure Code, an Indian court shall, on production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction unless the contrary appears on the record; but such presumption may be displaced by proving want of jurisdiction.

A judgment of a court in any non-reciprocating territory, such as the United States, may be enforced in India only by a suit upon the judgment subject to Section 13 of the Civil Procedure Code, and not by proceedings in execution. Section 13 of the Civil Procedure Code, which is the statutory basis for the recognition of foreign judgments (other than arbitration awards), states that a foreign judgment shall be conclusive as to any matter directly adjudicated upon between the same parties or between parties under whom they or any of them claim litigating under the same title except where:

- The judgment has not been pronounced by a court of competent jurisdiction;
- The judgment has not been given on the merits of the case;
- The judgment appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable;
- The proceedings in which the judgment was obtained are opposed to natural justice;
- The judgment has been obtained by fraud; and/or
- The judgment sustains a claim founded on a breach of any law in force in India.

A suit to enforce a foreign judgment must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. In addition, it is unlikely that an Indian court would enforce foreign judgments if it considered the amount of damages awarded as excessive or inconsistent with public policy or if the judgments are in breach of or contrary to Indian law. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the Reserve Bank of India to repatriate any amount recovered pursuant to execution of such judgment. Any judgment in a foreign currency would be converted into Rupees on the date of such judgment and not on the date of payment and any such amount may be subject to income tax in accordance with applicable laws. The Company cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

- 1. The novel coronavirus (Covid-19) pandemic outbreak and steps taken to control the same have significantly impacted our business, results of operations, financial condition and cash flows and further impact will depend on future developments, which are highly uncertain.***

The rapid and diffused spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on all businesses, including the textile industry in which our Company operates and from where it derives substantial revenues and profits. The COVID-19 pandemic could continue to have an impact that may worsen for an unknown period of time. In view of the onslaught of another wave of the virus, this pandemic may continue to cause unprecedented economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe.

At this point of time, our Company cannot predict by when our Company's operation shall resume to normalcy, or at all. Further if in case due to any second or consequent wave of Coronavirus, if another lockdown is imposed in the country, we may face huge losses and our business operations could be severely impacted. Any such interruptions or disruptions could cause delays in the completion of our orders and commitments made to clients, or cause damage to the goods in transit. Any of these consequences may result in loss of business and/or claims for compensation from our clients, which may have an adverse effect on our results of operations and financial condition.

- 2. We are yet to obtain consents/ no objection certificate from certain lenders of our Company for the Issue.***

Our Company has entered into agreements for fund based and non-fund-based borrowings with certain lenders. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations which *inter-alia* include change in capital structure (including this present proposed Issue), formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying secured loan and unsecured loans, undertake guarantee obligations, which shall require our Company to obtain prior approval. In accordance with the terms of the loan agreements, our Company had applied to nine (09) lenders for obtaining their consents/ non-objection certificates for undertaking this Issue, however, as of date of this Draft Letter of Offer, our Company has received no-objection certificates from five (05) lenders and is yet to receive no-objection certificates from Indian Bank, Punjab National Bank, Union Bank of India and Indian Overseas Bank. We have *vide* letters and emails dated January 04, 2021, February 22, 2021, March 01, 2021, April 02, 2021 and April 19, 2021 requested the aforementioned lenders to provide us with their consent/no objection certificate to undertake the Issue, however, as of date of this Draft Letter of Offer, we have not received any response from these lenders. Our Company proposes to utilize an aggregate amount of ₹ 9,800 lakhs from the Gross Proceeds of the Issue towards full or partial re-payment or prepayment of working capital loans availed by our Company from our secured lenders to the extent of Rs. 5,900 lakhs and inter corporate deposits to the extent of ₹ 3,900 lakhs availed from Murugan Enterprise Private Limited, one of our Corporate Promoter. Undertaking the Issue without obtaining consents/no objection certificates from the aforementioned lenders may constitute a breach of covenant under the relevant financing documents, which could entitle the respective lenders to consider this Issue as an event of default under the loan agreements, thereby entitling them to take adverse actions against our Company as per their respective agreements. The occurrence of any of the events mentioned above can adversely affect our business, results of operations and financial condition.

For details of these restrictive covenants, please refer to chapter titled — “*Financial Indebtedness*” on page 194 of this Draft Letter of Offer.

- 3. If we are unable to anticipate and respond to changes in fashion trends and changing customer preferences in a timely and effective manner, the demand for our products may decline, which may have an adverse effect on our business, results of operations and prospects.***

Our Company is engaged in the business of manufacturing, weaving and processing of cotton yarn, knit fabrics and garments. Our results of operations are dependent on our ability to anticipate, gauge and respond to changes in customer preferences and design of new products or modifying our existing products in line with changes in fashion trends as well as customer demands and preferences. If we are unable to anticipate,

gauge and respond to changing customer preferences or fashion trends, or if we are unable to adapt to such changes by modifying our existing products or launch new products on a timely basis, we may lose, or fail to attract customers, our inventory may become obsolete and we may be subject to pricing pressure to sell our inventory at a discount. A decline in demand for our products or a misjudgment on our part could lead to lower sales, excess inventories and higher markdowns, each of which may have an adverse effect on our results of operations and financial condition.

Further, our process for designing our products is a key aspect of our operations for which we rely heavily on data analysis and the study of industry and fashion trends to introduce new and original concepts. We incur expenses in the design and development of our products and we cannot assure you that our current portfolio of designs and any products we launch, will be well received by our customers, or that we will be able to recover costs we incurred in designing and developing such products. If the products that we launch are not as successful as we anticipate, our business, results of operations and prospects may be adversely affected.

4. *Our Company is significantly reliant on the revenues earned from our spinning division. Any downturn in our ability to increase or effectively manage our sales could have an adverse impact on our Company's business and results of operations.*

Since inception, our Company has been engaged in the business of spinning of cotton yarn. We have set up two manufacturing units in Tamil Nadu for carrying out the business activities under our spinning division. The spinning division contributed 61.28%, 64.35%, 60.12% and 54.66% towards our revenue of operations for the nine months period ended December 31, 2020 and the Fiscals 2020, 2019 and 2018, respectively. Our revenues are highly dependent on the customer base of our spinning division and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations.

The organised and unorganised textile industry is fragmented and inherently competitive with several regional brands and retailers present in local markets across the country. In the event, our customers substitute our products with that of our competitors due to difference in price or quality of the products, it may have an adverse impact on the demand for our products. Similarly, in the event our competitors who are larger than us or develop alliances to compete against us may be able to improve the efficiency of their manufacturing process or their distribution or raw materials sourcing process and thereby offer high quality products at lower price and our Company may be unable to adequately react to such developments which may affect our revenues and profitability. Furthermore, our competitors may be able to with-stand industry downturns better than us or provide customers with products at more competitive prices; thereby impacting our revenues and profitability adversely.

5. *We depend on a few customers of our products, for a significant portion of our revenue, and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations.*

Our Company is engaged in the business of manufacturing, weaving and processing of cotton yarn, knit fabrics and garments for direct sale to various garment manufacturers. In the nine months period ended December 31, 2020 and the Fiscals 2020, 2019 and 2018, 15.56%, 10.96%, 8.12% and 10.91% respectively, of our revenue from operations were derived from our top five customers (in the respective Fiscals). Our business operations are highly dependent on our customers, especially those catered by our spinning division and the loss of any of our customers from any industry which we cater to may adversely affect our sales and consequently on our business and results of operations.

While we typically have long term relationships with our customers, we have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future.

Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing our products. If there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

- 6. *We highly depend on our major raw materials and a few key suppliers who help us procure the same. Our Company has not entered into long-term agreements with its suppliers for supply of raw materials. In the event we are unable to procure adequate amounts of raw materials, at competitive prices our business, results of operations and financial condition may be adversely affected.***

Our Company is engaged in the business of manufacturing, weaving and processing of cotton yarn, knit fabrics and garments and cotton is used as the primary raw material during our manufacturing process in all our divisions. Therefore, we are highly dependent on cotton and it forms the most important and primary component of our manufacturing process. Our top five suppliers accounted for 20.07%, 20.58%, 12.49% and 17.51% of our expenses towards the purchase of raw materials for the nine months period ended December 31, 2020 and the Fiscals 2020, 2019 and 2018, respectively. Thus, if we experience significant increase in demand, or need to replace an existing supplier, we cannot assure you that we will be able to meet such demand or find suitable substitutes, in a timely manner and at reasonable costs, or at all. Further, in view of the ongoing pandemic and the onslaught of the second wave of Coronavirus in the country and various travel restrictions imposed throughout the country, we may not be able to procure adequate number of raw materials for our manufacturing units.

We depend on a number of suppliers for procurement of raw materials required for manufacturing our products. In the nine months period ended December 31, 2020 and the Fiscals 2020, 2019 and 2018, the cost of raw material consumed amounted to 70.84%, 70.23%, 67.75% and 68.18% of our total revenue respectively. Our Company maintains a list of registered and unregistered suppliers from whom we procure the raw materials on order basis. We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. We rely on pre-booking capacity with our suppliers, based on our demand projections. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us and may choose to sell their products to our competitors. Non-availability or inadequate quantity of raw material or use of substandard quality of the raw materials in the manufacture of our products, could have a material adverse effect on our business. Further, any discontinuation or a failure of these suppliers to adhere to the delivery schedule or failure to deliver the required quality and quantity could hamper our manufacturing schedule. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside us.

Further, the quantity of raw materials procured and the price, at which we procure such materials, may fluctuate from time to time. In addition, the availability and price of raw materials required by us may be subject to a number of factors beyond our control, including economic factors, seasonal factors, environmental factors and changes in government policies and regulations, including those relating to the laminate industry in general. We cannot assure you that we will always be able to meet our raw material requirements at prices acceptable to us, or at all, or that we will be able to pass on any increase in the cost of raw materials to our customers. Further, we also cannot assure you with a reasonable certainty that the raw materials that we would procure in the future will not be defective. In the absence of formal agreements, should we receive any defective raw materials, we may not be in a position to recover advance payments or claim compensation from our suppliers consequently increasing the manufacturing costs or reducing the realisation of our finished products. Any inability on our part to procure sufficient quantities of raw materials, on commercially acceptable terms, may lead to a decline in our sales volumes and profit margins which could adversely affect our business, results of operations and financial condition.

- 7. *There are outstanding litigations involving our Company and our Joint Venture and Subsidiary which, if determined adversely, may adversely affect our business and financial condition.***

As on the date of this Draft Letter of Offer, our Company and our Joint Venture and Subsidiary, Young Brand Apparel Private Limited are involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and/or severally from us and/or other parties, as the case may be. We cannot assure you that these legal proceedings will be decided in favour of our Company and our Joint Venture and Subsidiary, as the case may be, or that no further liability will arise out of these proceedings. We may incur significant expenses in such legal proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. Any adverse decision may adversely affect our business, results of operations and financial condition.

8. ***In the past, there have been instances of delayed or erroneous filing of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 to RoC by our Company and our Subsidiaries.***

- 9. As the securities of our Company are listed on Stock Exchanges in India, our Company is subject to certain obligations and reporting requirements under the SEBI Listing Regulations. Any non-compliances/delay in complying with such obligations and reporting requirements may render us liable to prosecution and/or penalties.**

The Equity Shares of our Company are listed on BSE and NSE, therefore we are subject to the obligations and reporting requirements prescribed under the SEBI Listing Regulations. There have been instances in the past wherein, our Company has failed to comply with the requirements of the SEBI Listing Regulations in a timely manner.

Our Company endeavours to comply with all such obligations/reporting requirements, there may be non-disclosures/delayed/erroneous disclosures and/or any other violations which might have been committed by us, and the same may result into Stock Exchanges and/or SEBI imposing penalties, issuing warnings and show cause notices against us and/or taking actions as provided under the SEBI Act and Rules and Regulations made there under and applicable SEBI Circulars. Any such adverse regulatory action or development could affect our business reputation, divert management attention, and result in a material adverse effect on our business prospects and financial performance and on the trading price of the Equity Shares.

- 10. We have incurred losses in the recent past. Continuous financial losses incurred by us may be perceived adversely by external parties such as clients and bankers, which could affect our reputation, business, financial condition and results of operation.**

Our Company has incurred losses in the recent past, attributable largely to the COVID 19 pandemic and its consequent nationwide lockdown, the details of which are provided below:

<i>(₹ in lacs)</i>	
Particulars	December 31, 2020
Loss incurred during the nine months period ended December 31, 2020	2,309.78

There can be no assurance that we will not incur losses in any future periods, or that there will not be an adverse effect on our reputation or business as a result of such losses. Such losses incurred by us may be perceived adversely by external parties such as customers, bankers, and suppliers, which could affect our reputation.

- 11. Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.**

Our Company has experienced negative net cash flow in operating, investing and financing activities in the past, the details of which are provided below:

<i>(₹ in lacs)</i>			
Particulars	March 31, 2020	March 31, 2019	March 31, 2018
Net Cash Flow from/(used in) Operating Activities	-*	-*	-*
Net cash generated from/(used in) investing activities	-*	(2,592.91)	(4,857.45)
Net Cash Flow from/(used in) Financing Activities	(12,696.81)	(4,853.36)	-*

*indicates positive cash flow.

We may incur negative cash flows in the future which could have a material adverse effect on our business, prospects, results of operations and financial condition.

- 12. The global scope of our operations exposes us to risks of doing business in foreign countries, including the constantly changing economic, regulatory, social and political conditions in the jurisdictions in which**

we operate and seek to operate, which could adversely affect our business, financial condition and results of operations.

We sell our products in countries such as China, England, Israel, Cameroon, United States of America, Germany, Spain, Japan, Italy, Korea, Thailand, Myanmar, Portugal, Egypt, Canada, Indonesia, Australia, Bangladesh, Hong Kong, Vietnam, Kenya, Sri Lanka, Poland, etc. In Fiscal 2020, 28.92% of our revenue from operations was from exports. Our business is therefore subject to diverse and constantly changing economic, regulatory, social and political conditions in the jurisdictions in which we operate and seek to operate. Operating in the international markets exposes us to a number of risks, including, but not limited to, compliance with local laws and regulations, which can be onerous and costly as the magnitude and complexity of, and continual amendments to, these laws and regulations are difficult to keep abreast with and the liabilities, penalties, costs, obligations and requirements associated with these laws and regulations can be substantial. Our failure to comply with and adapt to changing international regulations and/or trends may result in us failing to maintain and/or expand our international sales operations, which might adversely affect our business, financial condition and results of operations.

In case of any contingencies in the future, as a result of which we are unable to operate effectively in these markets, the results of our operations, revenues and profitability might be adversely affected. Due to this, we might not be able to expand our business effectively in the international market, thereby affecting our business, results of operations and financial condition.

13. The revenues earned from our export operations have been consistently declining for the past three financial years. Any further decline in our revenues from export operations could affect our business, financial condition and results of operation.

Our revenue from export operations for the Fiscals 2020, 2019 and 2018 was ₹ 14,344.47 lakhs, ₹ 23,195.40 lakhs and ₹ 34,228.70 lakhs, respectively. Any further decline in our export income could make us highly dependent on our domestic operations, thereby reducing and limiting our business and results of operations which could have an adverse impact our financial results. Although, there has been a constant increase in the income from our domestic operations, however a decline in our export operations could impact our brand image and also result in loss of our customer base in international markets. Such decline could also be perceived adversely by our prospective or existing international customers, thereby impacting our growth in such markets. Furthermore, in view of the onset of another wave of the Corona-virus, several countries have imposed transport restrictions, which could further impact our export operations. We cannot assure you that there will not be any further decline in our export income or such decline will not adversely impact our profits, business and results of operations.

14. A part of the Issue proceeds will be utilized by our Company for part- repayment or prepayment of inter-corporate deposits availed from one of our Corporate Promoter, Murugan Enterprise Private Limited.

One of the Objects of this Issue is to partly repay or pre pay the inter- corporate deposits amounting to ₹ 3,900 lakhs availed by our Company from our Corporate Promoter, Murugan Enterprise Private Limited. These inter-corporate deposits have been utilized by our Company towards partial repayment of our secured loans and augmentation of working capital requirements. Out of the Issue proceeds, we intend to utilize ₹ 3,900 lakhs for part repayment or pre-payment of inter-corporate deposits availed by our Company from our Corporate Promoter. For further details, please see the chapter titled “*Objects of the Issue*” beginning on page 69 of this Draft Letter of Offer.

15. Our continued operations are critical to our business and any shutdown of our manufacturing unit might adversely affect our business, results of operations and financial condition. Further, our manufacturing unit, our warehouses, godowns and all our facilities are currently located in one geographical area. The loss of, or shutdown of, our operations at this manufacturing or any disruption in the operation of our warehouses will adversely affect our business, financial condition and results of operations.

Our manufacturing units are located in Tamil Nadu and any local social unrest, natural disaster or breakdown of services and utilities in these areas might have material adverse effect on the business, financial position and results of our operations. Our current manufacturing units are subject to operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, obsolescence, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities.

In the event, we are forced to shut down our manufacturing units for a prolonged period; it would adversely affect our earnings, our other results of operations and financial condition as a whole. Spiraling cost of living around our units may push our manpower costs in the upward direction, which might reduce our margin and cost competitiveness. For instance, due to the ongoing pandemic and the nationwide lockdown which was imposed by the Central Government and various state governments, we had to shut down all our manufacturing units. Pursuant to various notifications issued by Ministry of Home Affairs, Government of India, all our manufacturing units were allowed to start their operations subject to the conditions prescribed therein. With the onslaught of a second wave of Coronavirus, a further lockdown might be imposed or if for other unforeseeable reasons, we might have to halt the operations in our manufacturing units, which might cause an adverse impact on our business operations, revenue, results of operations and financial conditions.

All our manufacturing units along with our windmill unit are located in Tamil Nadu. Any significant interruption or loss or shutdown of operations at our manufacturing units would adversely affect our business. Our manufacturing, processing and other business activities might be subject to unexpected interruptions, including natural or man-made disasters. Our facilities and operations might be adversely affected by, among other factors, breakdown or failure of equipment, difficulties or delays in obtaining spare parts and equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, natural disasters, raw material shortages, fire, explosion and other unexpected industrial accidents and the need to comply with the directives of relevant government authorities.

All our facilities namely, spinning, woven, knitting, processing, windmills, garments and other utilities are located in Tamil Nadu where our warehouses and godowns are also located. Any significant disruption, including social, political or economic factors or natural calamities or civil disruptions, impacting this region might adversely affect operations. Any failure of our systems or any shutdown of any of our manufacturing unit and facilities for any reason might result in significant increase of costs and delays in execution of orders. We do not have a diversified base of manufacturing operations, and local disturbances which would have a material adverse effect on our business, and consequently on our operations and financial condition. Further, our warehouses are subject to operating risks, such as performance below expected levels of efficiency, labour disputes, natural disasters, industrial accidents and statutory and regulatory restrictions. Any disruption of operations of our warehouses might result in delayed delivery of our product, which might lead to disputes and legal proceedings with them on account of any losses suffered by them or any interruption of their business operations due to such delay or defect. While our strategic objectives include geographical expansion across India, in the event that we are unable to make available our products in a prompt manner and within the requisite timelines our business, financial condition and prospects might be adversely affected.

Furthermore, any significant interruption to our operations directly or indirectly as a result of any industrial accidents, severe weather or other natural disasters might materially and severely affect our business, financial condition and results of operations. Similar adverse consequences could follow if war, or war-like situation were to prevail, terrorist attacks were to affect our related infrastructure, or if the Government of India were to temporarily take over the facility during a time of national emergency. In addition, any disruption in basic infrastructure, such as in the supply of electricity may substantially increase our manufacturing costs. Any disruption of our existing supply of infrastructure services such as power or water, our failure to obtain such additional supplies as required by us or an increase in the cost of such supplies may result in additional costs to us. In such situations, our production capacity may be materially and adversely impacted. In the event our facilities are forced to shut down for a significant period of time, our earnings, financial condition and results of operation would be materially and adversely affected.

16. Any failure in our quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations.

Our products might have certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. We have implemented quality control processes for our raw materials and finished goods on the basis of our internal quality standards. However, we cannot assure you that our quality control processes will not fail or the quality tests and inspections conducted by us will be accurate at all times. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality control procedures, negligence, human error or otherwise, may damage our products and result in deficient products. It is imperative for us to meet the international quality standards

set by our international customers and agencies as deviation from the same may cause them to reject our products and cause damage to our reputation, market standing and brand value.

In the event the quality of our products is sub-standard or our products suffer from defects and are returned by our customers due to quality complaints, we may be compelled to take back the sub-standard products and reimburse the cost paid by our customers. Such quality lapses may strain our longstanding relationship with our domestic and international customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which may have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

17. In the event our marketing initiatives do not yield intended results our business and results of operations may be adversely affected.

We believe that the recognition and reputation of our brands has contributed to the growth of our business. We intend to continue to enhance the brand recall of our products through the use of targeted marketing and public relations initiatives. In order to maintain and enhance such recognition and reputation, we may be required to invest significant resources towards marketing and brand building exercises, specifically with respect to new products we launch or for geographic markets where we intend to expand our operations. For the Fiscals 2020, 2019 and 2018 our advertisement and sales promotion expenses were ₹ 82.73 lakhs, ₹ 91.06 lakhs and ₹ 27.23 lakhs, or 0.07%, 0.08% and 0.03%, of our revenue from operations (net), respectively, and it shall be our endeavour to increase this proportion in the future.

We incur advertising and marketing expenses to increase brand recall and capture additional demand, and in the event they do not yield their intended results, or we are required to incur additional expenditures than anticipated, our business and results of operations might be adversely affected.

18. Some of the raw materials that we use are inflammable in nature. While we take adequate care and follow all relevant safety measures, there is a risk of fire and other accidents, at our manufacturing units and warehouses. Any accidents is likely to result in loss of property of our Company and/or disruption in the manufacturing processes which may have a material adverse effect on our results of operations, cash flows and financial condition.

The key raw material used by us for manufacturing our products is cotton. Due to its combustible nature of cotton and the semi-finished or finished products manufactured by us, we might be exposed to fires or other industrial accidents. While our Company believes that it has necessary controls and processes in place, any failure of such systems, mishandling of hazardous chemicals or any adverse incident related to the use of these chemicals or otherwise during the manufacturing process or storage of products and certain raw materials, may cause industrial accidents, fire, loss of human life, damage to our and third-party property or cause environmental damage. If any industrial accident, loss of human life or environmental damage were to occur we could be subject to significant penalties, other actionable claims and, in some instances, criminal prosecution. In addition to adversely affecting our reputation, any such accidents, may result in a loss of property of our Company and/or disruption in our manufacturing operations entirely, which may have a material adverse effect on our results of operations and financial condition. In addition to the loss as a result of such fire or industrial accident, any shutdown of any of our manufacturing units may result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition.

Further, any fire or industrial accident, any shutdown of our manufacturing units or any environmental damages will increase the regulatory scrutiny and result in enhanced compliance requirements including on use of materials and effluent treatment which would, amongst others, increase the cost of our operations. We cannot assure you that despite our best efforts we will not face similar situations at our manufacturing units which may result in significant loss to our Company and/or a disruption of our manufacturing operations. The loss incurred by our Company, though adequately insured, may or may not be recoverable through the insurance maintained by us. Such loss and/or disruption of our manufacturing operations may have a material adverse effect on our operations, cash flows and financial condition.

19. Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it may have a material adverse effect on our Company's results of operations and financial condition. Even though we have availed trade credit insurance policy (domestic and export risk) to insure our Company against the risk of commercial default insolvency and protracted default, we cannot assure you that the said policy will provide adequate cover towards the losses which may be incurred due to the defaults committed by our customers. For the Fiscals ending March 31, 2020, 2019 and 2018 our trade receivables were ₹ 17,472.17 lakhs, ₹ 19,616.10 lakhs and ₹ 13,012.22 lakhs, respectively, out of which, debts amounting to ₹ 814.52 lakhs, ₹ 657.17 lakhs and ₹ 605.04 lakhs were outstanding for a period exceeding six months.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfill their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

20. If our Company is unable to continue being creative or if we are unable to keep up to the changing trends in the textile industry, it may adversely affect our business, results of operations and prospects.

Our results of operations depend upon the continued demand of our products by our customers. Since we operate in a competitive industry where customers' purchases are highly subjective and sensitive to current trends along with creativity, keeping in with the latest trends is one of the key attributes for success. If we are unable to anticipate consumer preferences or industry changes, or if we are unable to update our products on a timely basis, we may lose customers to our competitors, or may be forced to reduce our sales realization on products by having to offer them at a discount, thereby reducing our margins. If we are not able to anticipate the demand, or misjudge the quantity, *inter alia*, this could lead to lower sales, higher inventories and higher discounts, each of which could adversely affect our brand, reputation, results of operations and financial condition.

21. Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.

Our business requires a significant amount of working capital. As per our settled business terms, we require our customers to pay the full amount of the consideration only after they receive the order, as a result, significant amounts of our working capital are often required to finance the purchase of raw material and execution of manufacturing processes before payment is received from our customers. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks are required to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we make provisions for bad debts, including those arising from such defaults based primarily age of the debt and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that

we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result, in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

22. *Failure to comply with the conditions applicable under Revised and Restructured Technology Upgradation Fund Scheme (“RRTUF”) and Amended Technology Upgradation Fund Scheme (“ATUFS”) being availed by us or withdrawal of the Schemes by the Government may render our Company ineligible for interest and capital subsidies.*

Our Company presently is eligible to avail benefits provided under RRTUF and ATUFS. For further details, please refer to the chapter titled “*Our Business*” on page 92 of this Draft Letter of Offer. These benefits and incentive are provided to our Company on fulfilment of certain conditions and eligibility criteria, if we fail to comply with the conditions stipulated under these policies, our Company may be denied such subsidies, which in turn will make our operations less cost effective and increase the prices of our products. Further, termination of, withdrawal or variations in the terms of such policies can adversely affect our profitability and/or our business operations. As a result, it might have a material adverse effect on results of operations and financial condition of our Company.

23. *If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected.*

Our current name and logo, is not owned or registered as a trade name or trademark by our Company under the provisions of the Trademarks Act, 1999 and therefore may be subject to counterfeiting or imitation which would adversely impact our reputation and lead to loss of customer confidence, reduced sales and higher administrative costs. Further, our Company does not enjoy the statutory protections accorded to a registered trademark. There can be no assurance that we will be able to register the trademark and the logo or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. If any of our unregistered trademarks or proprietary rights are registered by a third party, we may not be able to make use of such trademark or proprietary rights in connection with our business and consequently, we may be unable to capitalize on the brand recognition associated with our Company. We can neither assure you that we will be successful in such a challenge nor guarantee that eventually our name and logo will be registered in our name under the provisions of the Trademarks Act, 1999. As a result, we may not be able to prevent acts of counterfeiting or imitation of our name and logo and a passing off action may not provide sufficient protection until such time that registration is granted.

We are also exposed to the risk that other entities may pass off their products as ours by imitating our brand name and attempting to create counterfeit products. We believe that there may be other companies or vendors which operate in the unorganized segment using our brand names. Any such activities may harm the reputation of our brand and sales of our products, which could in turn adversely affect our financial performance. We rely on protections available under Indian law, which may not be adequate to prevent unauthorized use of our intellectual property by third parties. Furthermore, the application of laws governing intellectual property rights in India is uncertain and evolving, and could involve substantial risks to us. Notwithstanding the precautions we take to protect our intellectual property rights, it is possible that third parties may copy or otherwise infringe on our rights, which may have an adverse effect on our business, results of operations, cash flows and financial condition.

Furthermore, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming, continuous supply of raw materials or to deliver our costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to

enforce or protect its intellectual property, which might adversely affect our business, results of operations and financial condition.

- 24. *We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business. Further, if we are unable to adapt to technological changes and successfully implement new technologies or if we face failure of our information technology systems, we may not be able to compete effectively which may result in higher costs and would adversely affect our business and results of operations.***

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorised access to our networks. Further, the commercial success of our business is highly dependent on the developmental and innovative breakthroughs of our design division. In the event, any breach of our systems or software leads to the leaking of our designs or any inventive design techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors.

Our future success depends in part of our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Our failure to successfully adopt such technologies in a cost-effective manner could increase our costs thereby compelling us to bid at lower margins which might lead to loss of bidding opportunities vis-à-vis such competitors. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

- 25. *We do not own certain premises used by our Company. Disruption of our rights as licensee/ lessee or termination of the agreements with our licensors/ lessors would adversely impact our manufacturing operations and, consequently, our business.***

As on the date of this Draft Letter of Offer, our Registered Office, the land on which our processing unit is situated, manufacturing unit for home textiles, warehouses, godowns and stockyards have been taken on lease by our Company from related parties or third parties. For details, please refer to the chapter titled “*Our Business- Our Immovable Properties*” on page 104 of this Draft Letter of Offer.

There is no assurance that our Company will be able to renew the lease agreements or deeds entered into with third parties in a timely manner or at all. Further, there is no assurance that we will not face any disruption of our rights as a lessee/ licensee and that such leave and license and lease agreements will not be terminated prematurely by the licensor/lessor. Any such non-renewal or early termination or any disruption of our rights as lessee / licensee might adversely affect our business operations.

- 26. *The Equity Shares of our Company are not frequently traded on the Stock Exchanges.***

The Equity Shares of our Company are not frequently traded on the Stock Exchanges, as per the meaning ascribed to “frequently traded shares” under Regulation 2(1)(j) of SEBI Takeover Regulations. For further details, please refer to the chapter titled “*Market Price Information*” on page 204 of this Draft Letter of Offer.

- 27. *Our Company does not have any documentary evidence for the educational qualifications of one of our***

As of date of this Draft Letter of Offer, there are no pending proceedings, which have been initiated against us by the statutory authorities. We cannot assure you that in the near future there will not be any legal actions taken against us for the same.

Further, our licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company's operations and may adversely affect our business.

33. *We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.*

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company might not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which might have an adverse effect on our business, results of operations and financial condition.

34. *We are dependent on third party transportation providers for delivery of raw materials to us from our suppliers and delivery of our products to our customers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations may adversely affect our business, financial condition and results of operation.*

All our manufacturing units, warehouses, godowns, stockyards and other utilities are located in Tamil Nadu. To ensure smooth functioning of our manufacturing operations, we need to maintain continuous supply and transportation of the raw materials required from the supplier to our manufacturing units or warehouses and transportation of our products from our units or warehouses to our customers, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of raw materials to us and delivery of our products to our customers. Uncertainties and risks such

as transportation strikes or delay in supply of raw materials and products is likely to have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to maintain a continuous supply of raw materials or to deliver our products to our customers in a timely, efficient and reliable manner may adversely affect our business, results of operations and financial condition.

Further, we have not entered into any long-term agreements with our transporters for any of our manufacturing units and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfill their obligations or would not commit a breach of the understanding with us. In the event that the finished goods or raw materials suffer damage or are lost during transit, we may not be able to prosecute the agencies due to lack of formal agreements. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which might adversely affect our business, results of operations and financial condition.

35. If we are unable to identify customer demand accurately and maintain an optimal level of inventory proportionately, our business, results of operations and financial condition may be adversely affected.

The success of our business depends upon our ability to anticipate and forecast customer demand and trends. Any error in such identification could result in either surplus stock, which we may not be able to sell in a timely manner, or no stock at all, or under stocking, which will affect our ability to meet customer demand. We plan our inventory and estimate our sales based on the forecast, demand and requirements for our products based on past data. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively by readily making our products available to our customers. Ensuring continuous availability of our products requires prompt turnaround time and a high level of coordination across raw material procurement, manufacturers, suppliers, warehouse management and departmental coordination. While we aim to avoid under-stocking and over-stocking, our estimates and forecasts may not always be accurate. If we fail to accurately forecast customer demand, we may experience excess inventory levels or a shortage of products available for sale. If we over-stock inventory, our capital requirements may increase and we may incur additional financing costs. Any unsold inventory would have to be sold at a discount, leading to losses. We cannot assure you that we will be able to sell surplus stock in a timely manner, or at all, which in turn may adversely affect our business, results of operations and financial condition. If we under-stock inventory, our ability to meet customer demand may be adversely affected.

36. We have significant power requirements for continuous running of our factories. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations and financial condition.

All our manufacturing units have significant electricity requirements and any interruption in power supply may temporarily disrupt our operations. Our manufacturing units get a significant amount of power supply from our wind mill unit and we also source power supply from third parties. Since, we have a high-power consumption, any unexpected or unforeseen increase in the tariff rates can increase the operating cost of our manufacturing unit and thereby cause an increase in the production cost which we may not be able to pass on to our customers. We are dependent upon our wind mill unit for a significant portion of power supply, in the event there occurs a mishap or if we are forced to halt the operations of wind mill unit it will have a adverse effect on our business and the operation of our manufacturing units.

We cannot assure you that our wind mill unit will function effectively and that we will not be forced to approach third parties power suppliers for availing power supply in addition to the amount sanctioned to us. We also cannot assure you that we will be able to avail the power supply at prices acceptable to us, or that we will be able to pass on any increase in the price of power supply to our customers. There are limited number of electricity providers in area from where we operate due to which in case of a price hike, we may not be able to find a cost-effective substitute, which will negatively affect our business, financial condition, cash flows and results of operations. For further details, please refer to the chapter titled “*Our Business-Power*” on page 101 of this Draft Letter of Offer.

37. Our industry is competitive and our inability to compete effectively will adversely affect our business, results of operations, financial condition and cash flows.

The textile industry in India is fragmented and competitive with several regional brands and retailers present in local markets across the country. The textile market in India has historically been dominated by the unorganized sector. Our products compete with local retailers, non-branded products, economy brands and products of other established brands. Any increase in sale of such brands or if preference is given to such brands it may have an adverse impact on our business and results of operations. Some of our competitors may be able to procure raw materials at lower costs than us, and consequently be able to sell their products at lower prices. As a result, our competitors may be able to withstand industry downturns better than us or provide customers with products at more competitive prices. Some of our international competitors may be able to capitalize on their overseas experience to compete in the Indian market.

We cannot assure you that we will be able to effectively and successfully compete in future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition. For further details, please see “*Industry Overview*” on page 80 of this Draft Letter of Offer.

38. *We do not have any offshore offices to manage our international operations.*

We sell our products in countries such as China, England, Israel, Cameroon, United States of America, Germany, Spain, Japan, Italy, Korea, Thailand, Myanmar, Portugal, Egypt, Canada, Indonesia, Australia, Bangladesh, Hong Kong, Vietnam, Kenya, Sri Lanka, Poland, etc. In Fiscal 2020, 28.92% of our revenue from operations was from exports. A significant portion of our revenue is derived from our export operations however, we have not set up any offshore offices to supplement our international operations. Consequently, we may not be able to properly market our products, capitalise opportunities offered by the international markets or co-ordinate with the intermediaries of such markets to effectively forecast market demands, fashion trends in a timely manner. We cannot assure you that in the near future we will be able to set up our offices overseas to manage our international operations and that the lack of same will not adversely affect our business.

39. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Directors and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details, please see the section titled “*Financial Information*” at page 122 of this Draft Letter of Offer.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

40. *Our Company has extended corporate guarantee with respect to loan facilities availed by our Joint Venture and Subsidiary, Young Brand Apparel Private Limited. Any defaults committed by our Joint Venture and Subsidiary or invocation of the guarantee extended by our Company may adversely affect our business operations and financial condition.*

Our Company has extended corporate guarantee in favour of Punjab National Bank with respect to the loan facilities availed by our Joint Venture and Subsidiary, Young Brand Apparel Private Limited. In the event the business and operations of our Joint Venture and Subsidiary deteriorates and if it commits a default in payment of principal or interest due to the bank, the corporate guarantee extended by our Company may get invoked.

On the occurrence of any of the above-mentioned situations, the Bank might demand repayment of the outstanding amounts under the said facilities sanctioned to our Subsidiary. In the event, we are unable to repay the outstanding amount in a timely manner or at all, the Bank may enforce the restrictive covenants or consequences of defaults which in turn may affect our further borrowing abilities thereby adversely affecting our business and operations. For further details, please refer to the chapter titled — “*Financial Indebtedness*” on page 194 of this Draft Letter of Offer.

41. *Some of our Subsidiaries may have conflicts of interest as they are engaged in similar business and may compete with us.*

Some of our Subsidiaries are engaged in the same industry segment as our Company. Although the product portfolio offered by some of our Subsidiaries differs from our Company, however there might be conflicts of interest in future. We have not entered into any non-compete agreements with such Subsidiaries and there can be no assurance that such Subsidiaries will not compete with our existing business or any future business that we might undertake or that we will be able to suitably resolve such a conflict without an adverse effect on our business and financial performance.

42. *Any conflict of interest which may occur between our business and any other similar business activities pursued by our Individual Promoter could have a material adverse effect on our business and results of operations.*

As of the date of this Draft Letter of Offer, our Individual Promoter, Sangampalayam Vedanayagam Arumugam is a director on the board of directors of our Subsidiaries as well as our Joint Venture and Subsidiary which are engaged in business activities similar to our business, thereby causing a conflict of interest between our Company and our Individual Promoter. We have not entered into a non-compete arrangement with him to address such conflicts. We cannot assure you that a conflict will not arise, or that we will be able to suitably resolve any such conflict without an adverse effect on our business or operations.

43. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

After the completion of the Issue, our Promoters and the members of the Promoter Group will hold approximately [●]% of the paid-up equity share capital of our Company assuming full subscription to the Rights Entitlement in the Issue. Our Promoters and the members of the Promoter Group holding Equity Shares in our Company, have undertaken to fully subscribe for their Rights Entitlement. They reserve the right to subscribe for their Rights Entitlement pursuant to any renunciation made by any member of the Promoter Group to another member of the Promoter Group. Such subscription for Equity Shares over and above their Rights Entitlement, if allotted, may result in an increase in their percentage shareholding above their current percentage shareholding. So long as the Promoters have a majority holding, they will be able to elect the entire Board and control most matters affecting us, including the appointment and removal of the officers of our Company, our business strategy and policies and financing. Further, the extent of the Promoters’ shareholding in our Company may result in the delay or prevention of a change of management or control of our Company, even if such a transaction may be beneficial to the other shareholders of our Company.

44. *We have certain contingent liabilities and our financial condition and profitability may be adversely affected if any of these contingent liabilities materialize.*

As of March 31, 2020, our contingent liabilities and commitments (to the extent not provided for) as disclosed in the notes to our Restated Financial Information aggregated to ₹ 1391.20 lakhs. The details of our contingent liabilities are as follows:

For further details of contingent liability, see the section titled — “*Financial Information*” on page 122 of this Draft Letter of Offer. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

45. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of December 31, 2020, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group and our Subsidiaries relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please see the section titled “*Financial Information*” at page 122 of this Draft Letter of Offer.

While we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

46. *The agreements executed by our Company and our Subsidiaries with lenders for financial arrangements contain restrictive covenants for certain activities and if we or our Subsidiaries are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We and our Subsidiaries have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying unsecured loans/inter corporate deposits availed from Promoters and third parties, undertake guarantee obligations on behalf of any other borrower including subsidiaries, which require our Company and our Subsidiaries to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us or our Subsidiaries with these approvals in the future. For details of these restrictive covenants, please refer to chapter titled — “*Financial Indebtedness*” on page 194 of this Draft Letter of Offer.

Further, some of the financing arrangements include covenants which mandate us and our Subsidiaries to maintain total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. This might have an adverse effect on our cash flows, business, results of operations and financial condition. For details of the events of default and the actions which can be taken by the banks on occurrence of such events, please refer to “*Events of Default*” and “*Consequences of default*” in the chapter titled “*Financial Indebtedness*” on page 194 of this Draft Letter of Offer.

47. *In addition to the existing indebtedness our Company or our Subsidiaries, may incur further indebtedness during the course of business. We cannot assure that our Company or our Subsidiaries would be able to service the existing and/ or additional indebtedness.*

As on December 31, 2020 the total fund based indebtedness of our Company is ₹ 52,183.69 lakhs and our Subsidiaries is ₹ 7,903.31 lakhs. In addition to the indebtedness for the existing operations of our Company or our Subsidiaries, may incur further indebtedness during the course of their business. We cannot assure you that our Company or our Subsidiaries will be able to obtain further loans at favourable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements,

which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service the indebtedness of our Company or our Subsidiary or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company or our Subsidiary, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “*Financial Indebtedness*” on page 194 of this Draft Letter of Offer.

48. *Our Company has availed certain inter corporate deposits from our Corporate Promoter, Murugan Enterprise Private Limited, which are recallable in nature.*

As on March 31, 2021, our Company has outstanding inter corporate deposits aggregating to ₹ 3,900 lakhs, which have been extended by our Corporate Promoter, Murugan Enterprise Private Limited which may be recalled at any time after the expiry of three years from the date of their disbursement. We cannot assure you that our Corporate Promoter will not demand repayment of inter corporate deposits extended to us prior to the aforementioned time period or after the expiry of such period. In the event, our Corporate Promoter seeks a repayment of any these inter corporate deposits, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to carry out the operations or complete our ongoing operations. Therefore, any such demand may adversely affect our business, financial condition and results of operations. For further details, see “*Financial Indebtedness*” on page 194 of this Draft Letter of Offer.

49. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

50. *Our success largely depends upon the knowledge and experience of our Promoters, Directors and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.*

The growth and success of our Company’s future significantly depends upon the experience and continued services and the management skills of our Key Managerial Personnel and the guidance of our Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business.. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “*Our Management*” on page 108 of this Draft Letter of Offer.

51. *Non-compliance with and changes in, safety, health, labour and environmental laws and other applicable regulations, may adversely affect our business, results of operations and financial condition.*

Our Company is engaged in the business of manufacturing cotton yarn, fabrics, processing of fabrics and garments for sale to various manufacturers which makes it mandatory for us to comply with extensive laws and government regulations, including in relation to safety, health and environmental protection. In view of the nature of our manufacturing process and the significant quantity of water utilized in processing and dyeing of fabrics, our processing facility generates a considerable amount of water waste which is treated in-house through a zero-discharge effluent treatment plant installed in the said facility. We cannot assure you that there will not arise a situation wherein we shall not be able to effectively treat the industrial waste, thereby failing to comply with the necessary procedures and requirements laid down under the applicable environmental laws. On the occurrence of any of the above events, we could face regulatory action which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities. There can be instances in the future, where our Company may be forced to halt our business operations in our manufacturing units on receiving adverse orders from state pollution control boards. We cannot assure you that there will not be any instances in the future wherein our Company will not be forced to halt the operations in its manufacturing units due to not complying with the applicable laws and such events will not cause loss of revenue and have an adverse impact on our business operations.

India has stringent labour legislations which protect the interest of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution, working conditions, hiring and termination of employees, contract labour and work permits and maintenance of regulatory and statutory records and making periodic payments, minimum wages and maximum working hours, overtime, working conditions, etc.

Our Company is also subject to safety, health and environment laws and regulations such as the Environment (Protection) Act, 1986, the Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act, 1981. These laws and regulations impose controls on our Company's safety standards, and other aspects of its operations. Our Company has incurred and expects to continue to incur, operating costs to comply with such laws and regulations. In addition, our Company has made and expects to continue to make capital expenditures on an on-going basis to comply with the safety and health laws and regulations. Our Company may be liable to the Central and State governmental bodies with respect to its failures to comply with applicable laws and regulations. Further, the adoption of new safety and health laws and regulations, new interpretations of existing laws, increased governmental enforcement of laws or other developments in the future may require that our Company make additional capital expenditures or incur additional operating expenses in order to maintain its current operations or take other actions that could adversely affect its financial condition, results of operations and cash flow. Safety, health and environmental laws and regulations in India and all around the world, in particular, have been increasing in stringency and it is possible that they will become significantly more stringent in the future. The costs of complying with these requirements could be significant and may have an impact on our financial condition. Therefore, if there is any failure by us to comply with the terms of the laws and regulations governing our operations we may be involved in litigation or other proceedings, or be held liable in any litigation or proceedings, incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business and results of operations.

- 52. *Our Company is highly dependent on skilled and unskilled labour for manufacturing of our products. Our manufacturing processes are labour intensive, therefore our operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees. If we are unable to continue to hire skilled and unskilled labour, in sufficient numbers and the quality and quantity of our products being manufactured in our units can get affected.***

Our operations are significantly dependent on access to a large pool of laborers for operation of our manufacturing unit. As of December 31, 2020, we had 3,322 permanent full-time employees. Our dependence on skilled and unskilled labour may result in significant risks for our operations, relating to the availability and skill of such labourers, as well as contingencies affecting availability of such laborers during peak periods. Further, our manufacturing units are surrounded by a number of industries, which may create a demand-supply gap in the labour industry which may impact our business operations. There can be no assurance that we will have adequate access to skilled and unskilled workmen at reasonable rates. As a result, we may be required to incur additional costs to ensure timely execution of our projects. In addition to the above, in view of the ongoing pandemic and the lockdown which was imposed by several State and Central Governments, there is an acute shortage of laborers, since most of the labourers have returned to their native places due to the widening income gap and lack of adequate resources to sustain their livelihood. In the event, we are unable to source adequate numbers of laborers for our manufacturing units or if we are exposed

to an increased expense due to the surge in the wages of such laborers we cannot assure you that it will not impact our business operations and financial condition. Due to the increase in the wages paid to the labours, we may have to increase the cost of our product which would directly impact our customers. In the event, we are unable to deploy the required number of labours to run our manufacturing units for addressing such increased demand of our products, we might not be able to efficiently and timely satisfy the demand of our customers. We believe our employees and labour employed in our manufacturing unit are critical to maintain our competitive position. Although we have not experienced any material labour unrest, we cannot assure you that we will not experience disruptions in work due to disputes or other problems with our work force, which may adversely affect our ability to continue our business operations. Any labour unrest directed against us, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations and could adversely affect our results of operations and financial position.

53. *Our operations can be adversely affected in case of industrial accidents at our manufacturing unit. Any fire or mishap or accidents of such nature at the Company's facilities could lead to accident claims and damage and loss of property, inventory, raw materials, etc. Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

Our manufacturing process requires the use of machines, which makes the labour employed at our manufacturing unit prone to accidents that occur during the course of our operations resulting in personal injuries causing permanent disability or even death. Further, the key raw material used by us for manufacturing our products is cotton. Due to its combustible nature of cotton and the semi-finished or finished products manufactured by us, we may be exposed to fires or other industrial accidents and every stage from procurement, processing, storage and transportation to trading is fraught with an imminent risk of loss by fire. With the use of chemicals, boilers, large volume of air for material handling, etc. the risk of fire hazard increases exponentially. The stocks of finished goods, raw materials, godowns and the main manufacturing area are more prone to such accidents, which could cause substantial loss to our machinery, thus hampering our business operations. If there occurs an accident or mishap due to fire, it could adversely affect our results of operations and financial position.

We have obtained certain insurance policies such as standard fire and special perils policy, marine cargo open policy, group janata personal accident insurance policy, personal accident insurance (group) policy, trade credit insurance policy (domestic and export risk), etc. The standard fire and special perils policy insures *inter alia* our raw materials that is, stock of cotton bales, yarn, waste cotton, textile machinery, spares, stock of yarn bags and stock of cotton waste, electrical installations, office equipment, computers and accessories, lab equipment, building, plant and machinery, stock, stock in process, finished goods, semi-finished, interior decorations, consumables, chemicals, high speed diesel, packing materials, traded goods of yarn and fabric, etc. The marine cargo open policies cover the risks associated with the transit of raw-materials, finished goods, stores and consumables to and from the manufacturing units. The group janata personal accident insurance policy, personal accident insurance (group) policy insure our employees and workers. Further the trade credit insurance policy (domestic and export risk) insure our Company against the risk of commercial default insolvency and protracted default. Although, we have taken appropriate insurance cover, there can be no assurance that our insurance policies will be adequate to cover the losses which we may incur due to the occurrence of an accident or a mishap.

There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. We have adopted adequate safety measures; however, we cannot assure you that, in the future no such cases will be instituted against our Company, alleging that we were negligent or we did not provide adequate supervision therefore, holding us liable for injuries that were suffered during the manufacture of our products. In the event any such accidents take place in the manufacturing unit of our Company, we may get involved in litigation or other proceedings, or be held liable in any litigation or proceedings, incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business and results of operations. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it may adversely affect our results of operations and financial position.

54. *Our Company is subject to foreign exchange control regulations which can pose a risk of currency fluctuations.*

Our Company is involved in various business transactions with international clients and has to conduct the same in accordance with the rules and regulations prescribed under FEMA. Due to non-receipt of such payments in a timely manner, our Company may fail to adhere to the prescribed timelines and may be required to pay penalty to the appropriate authority or department to regularize the payment. Similarly, due to our sacrosanct reliance on our primary raw material being cotton we are exposed to a risk of increase in costs of raw materials due to the currency fluctuations. Further, our international operations (export sales) make us susceptible to the risk of currency fluctuations, which may directly affect our operating results. In case we are unable to adhere to the timelines prescribed under the applicable laws or are unable to mitigate the risk of currency fluctuation, it may adversely affect our business, results of operations, financial conditions and cash flows.

55. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital intensive and we are required to obtain consents from certain of our lenders prior to the declaration of dividend as per the terms of the agreements executed with them. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Although our Company has declared dividends in the past, however there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “*Financial Indebtedness*” and the chapter titled “*Dividend Policy*” on pages 194 and 121 respectively, of this Draft Letter of Offer.

56. *Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.*

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

57. *The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Issue”.*

As the issue size is not more than ₹10,000 lakhs, under Regulation 82 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilisation of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilisation of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same. For further details, please refer to the chapter titled — “*Objects of the Issue*” on page 69 of this Draft Letter of Offer.

58. *We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.*

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled “*Industry Overview*” of this Draft Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Letter of Offer. Further, the industry data mentioned in this Draft Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Letter of Offer in this context.

ISSUE SPECIFIC RISKS

59. *Our Company will not distribute the Letter of Offer and Application Form to certain overseas Shareholders who have not provided an address in India for service of documents.*

Our Company will dispatch the Letter of Offer, the Abridged Letter of Offer, Rights Entitlement Letter and Application Form (the “**Offering Materials**”) to such Shareholders who have provided an address in India for the service of documents. The Offering Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e- mail. Presently, there is a lack of clarity under the Companies Act, 2013, and the rules thereunder, with respect to the distribution of Offering Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions.

60. *SEBI has recently, by way of circulars dated January 22, 2020, May 6, 2020, July 24, 2020, January 19, 2021 and April 22, 2021, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Draft Letter of Offer.*

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020, July 24, 2020, January 19, 2021 and April 22, 2021, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “*Terms of the Issue*” on page 225.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

61. *The R-WAP payment mechanism facility proposed to be used for this Issue may be exposed to risks, including risks associated with payment gateways.*

In accordance with SEBI circulars dated May 6, 2020, July 24, 2020, January 19, 2021 and April 22, 2021, a separate web based application platform, i.e., the R-WAP facility (accessible at www.linkintime.co.in), has been instituted for making an Application in this Issue by resident Investors. Further, R-WAP is only an

additional option and not a replacement of the ASBA process. On R-WAP, the Eligible Shareholders can access and fill the Application Form in electronic mode and make online payment using the internet banking or UPI facility from their own bank account thereat. For details, see “*Terms of the Issue*” on page 225. Such payment gateways and mechanisms are faced with risks such as:

- keeping information technology systems aligned and up to date with the rapidly evolving technology;
- in the payment services industries;
- scaling up technology infrastructure to meet requirements of growing volumes;
- applying risk management policy effectively to such payment mechanisms;
- keeping users’ data safe and free from security breaches; and
- effectively managing payment solutions logistics and technology infrastructure.

Further, R-WAP is a new facility which has been instituted due to challenges arising out of COVID-19 pandemic. We cannot assure you that R-WAP facility will not suffer from any unanticipated system failure or breakdown or delay, including failure on part of the payment gateway, and therefore, your Application may not be completed or rejected. These risks are indicative and any failure to manage them effectively can impair the efficacy and functioning of the payment mechanism for this Issue. Since Application process through R-WAP is different from the ASBA process, there can be no assurance that investors will not find difficulties in accessing and using the R-WAP facility.

62. *The entitlement of Rights Equity Shares to be allotted to investors applying for Allotment in physical form, will be kept in abeyance.*

In accordance with the SEBI ICDR Regulations, the option to receive the Rights Equity Shares in physical form will not be available after a period of six months from the date of coming into force of the SEBI ICDR Regulations, i.e., May 10, 2019. Since, the Rights Equity Shares offered pursuant to this Issue will be Allotted only after May 10, 2019, the entitlement of Rights Equity Shares to be Allotted to the Applicants who have applied for Allotment of the Rights Equity Shares in physical form will be kept in abeyance in electronic mode by our Company until the Applicants provide details of their demat account particulars to the Registrar. Pursuant to a press release dated December 3, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares).

63. *The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholder”) may lapse in case they fail to furnish the details of their demat account to the Registrar.*

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020 and May 6, 2020, read with SEBI circular SEBI/HO/CFD/DIL1/CIR/P/2020/136 dated July 24, 2020, SEBI circular SEBI/HO/CFD/DIL1/CIR/P/2021/13 dated January 19, 2021 and SEBI circular bearing reference number SEBI/HO/CFD/DIL2/CIR/P/2021/552 dated April 22, 2021, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “*Terms of the Issue*” on page 225. In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circulars, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only.

64. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account

of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, see “*Terms of the Issue*” on page 225.

65. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

66. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

67. *You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.*

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

68. *There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.*

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

69. *Holder of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution,

unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

70. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

71. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

72. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

73. *The outbreak of Novel Coronavirus, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

The outbreak, or threatened outbreak, of any severe epidemic caused due to viruses (particularly the Novel Coronavirus) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of Novel Coronavirus has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding Novel Coronavirus and no government-certified treatment or vaccine is available. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of Novel Coronavirus remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts. If any of our employees were suspected of contracting Novel Coronavirus or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of Novel Coronavirus will cause an economic slowdown and it is possible that it could cause a global recession. The spread of Novel Coronavirus has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed.

The extent to which the Novel Coronavirus further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact Novel Coronavirus may have on our results and financial condition, but there can be no assurance that this analysis will enable us to avoid part or all of any impact from the spread of Novel Coronavirus or its consequences, including downturns in business sentiment generally or in our sector in particular. The degree to which Novel Coronavirus impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

74. Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards (“IFRS”), which investors may be more familiar with and consider material to their assessment of our financial condition.

Our restated summary statements of assets and liabilities as at March 31, 2020 and restated summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Fiscals 2020 have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules and restated in accordance with the SEBI ICDR Regulations, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Draft Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Draft Letter of Offer will provide meaningful information is entirely dependent on the reader’s level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Letter of Offer should accordingly be limited.

75. Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India.

Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

76. A slowdown in economic growth in India could cause our business to suffer.

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

77. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards (“**ICDS**”), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

- the General Anti Avoidance Rules (“**GAAR**”) have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.

- a comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

78. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an

adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

79. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

80. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

81. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

82. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure.

Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2021 and the Ministry of Finance has notified the Finance Act, 2020 (“**Finance Act**”) on March 27, 2020, pursuant to assent received from the President, and the Finance Act will come into operation with effect from July 1, 2020. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, a draft of the Personal Data Protection Bill, 2019 (“**Bill**”) has been introduced before the Lok Sabha on December 11, 2019, which is currently being referred to a joint parliamentary committee by the Parliament. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

83. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

84. *We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.*

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;

- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighboring countries;
- hostile or war like situations with the neighboring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies; and
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

85. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The recent outbreak of Novel Coronavirus has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

A new Section 115BAA has been inserted by the Taxation Laws (Amendment) Act, 2019 (“**the Amendment Act, 2019**”) granting an option to domestic companies to compute corporate tax at a reduced rate of 25.17% (22% plus surcharge of 10% and cess of 4%) from the Financial year 2019-20, provided such companies do not avail specified exemptions/incentives (e.g. deduction under Section 10AA, 32(1)(ia), 33ABA, 35(2AB), 80-IA etc.)

The Amendment Act, 2019 also provides that domestic companies availing such option will not be required to pay Minimum Alternate Tax (“**MAT**”) under Section 115JB. The CBDT has further issued Circular 29/2019 dated October 02, 2019 clarifying that since the MAT provisions under Section 115JB itself would not apply where a domestic company exercises option of lower tax rate under Section 115BAA, MAT credit would not be available. Corresponding amendment has been inserted under Section 115JAA dealing with MAT credit.

The Company is eligible to exercise the above option, but not yet exercised the option for lower corporate tax rate due to availability of MAT credit as on the date of this report. Further, the Material Subsidiary i.e., Young Brand Apparels Private Limited has opted for this lower corporate tax for FY 2019-20.

- **Additional depreciation**

The Company is eligible for claim of additional depreciation at the rate of 20% of the actual cost of specified machinery or plant acquired and installed at their manufacturing plant after 31 March 2005 over and above the normal depreciation. (Section 32 of the Act)

- **Deductions from Gross Total Income**

Section 80IA- Deduction in respect of undertaking/s engaged in power generation.

Subject to fulfilment of prescribed conditions, the Company is entitled to claim deduction, under the provisions of Section 80IA of the Act, from the Gross Total Income of an amount equal to hundred percent of the profits and gains derived from eligible undertaking/s , engaged power generation. The benefit period is ten consecutive

assessment years out fifteen assessment years beginning from the year in which the eligible undertaking begins to operate the facility.

The Company is eligible to claim 100% of profit generated from Windmill Unit till FY 2020-21 under section 80IA of the Act.

Section 80 JJAA -Deduction in respect of employment of new employees

Subject to fulfilment of prescribed conditions, the Company and the Material Subsidiaries are entitled to claim deduction, under the provisions of Section 80JJAA of the Act, of an amount equal to thirty per cent of additional employee cost (relating to specified category of employees) incurred in the course of business in the previous year, for three assessment years including the assessment year relevant to the previous year in which such employment is provided.

Section 80M - Deduction in respect of inter-corporate dividends

A new Section 80M has been inserted by the Finance Act, 2020 w.e.f. April 1, 2020 providing for deduction from gross total income of a domestic company, of an amount equal to dividends received by such company from another domestic company or a foreign company or a business trust as does not exceed the amount of dividend distributed by it on or before one month prior to the date of filing its tax return as prescribed under Section 139(1) of the Act.

Where the Company or Material Subsidiaries receives any such dividend during a Financial Year and also, distributes dividend to its shareholders before the aforesaid date, as may be relevant to the said Financial Year, it shall be entitled to the deduction under Section 80M of the Act.

2. Special tax benefits available to Shareholders

There are no special tax benefits available to the shareholders (other than resident corporate shareholder) of the Company.

With respect to a resident corporate shareholder, a new section 80M is inserted in the Finance Act, 2020, to remove the cascading effect of taxes on inter-corporate dividends during financial year 2020-21 and thereafter. The section provides that where the gross total income of a domestic company in any previous year includes any income by way of dividends from any other domestic company or a foreign company or a business trust, there shall, in accordance with and subject to the provisions of this section, be allowed in computing the total income of such domestic company, a deduction of an amount equal to so much of the amount of income by way of dividends received from such other domestic company or foreign company or business trust as does not exceed the amount of dividend distributed by it on or before the due date. The "due date" means the date one month prior to the date for furnishing the return of income under sub-section (1) of section 139.

GLOBAL OUTLOOK

Multiple vaccine approvals and the launch of vaccination in some countries in December have raised hopes of an eventual end to the pandemic. Moreover, economic data released after the October 2020 WEO forecast suggest stronger-than-projected momentum on average across regions in the second half of 2020. Despite the high and rising human toll of the pandemic, economic activity appears to be adapting to subdued contact-intensive activity with the passage of time. Finally, additional policy measures announced at the end of 2020—notably in the United States and Japan—are expected to provide further support in 2021–22 to the global economy. These developments indicate a stronger starting point for the 2021–22 global outlook than envisaged in the previous forecast.

However, surging infections in late 2020 (including from new variants of the virus), renewed lockdowns, logistical problems with vaccine distribution, and uncertainty about take-up are important counterpoints to the favorable news. Much remains to be done on the health and economic policy fronts to limit persistent damage from the severe contraction of 2020 and ensure a sustained recovery.

Third quarter GDP outturns mostly surprised on the upside (Australia, euro area, India, Japan, Korea, New Zealand, Turkey, United States) or were in line with expectations elsewhere (China, Mexico). Among components, private consumption rebounded the most. Investment picked up relatively slowly, except in China (Figure 2). The expenditure decompositions suggest a release of pent-up demand and adjustments to telework. Given the largely one-off nature of such spending, it is likely to dissipate once the adjustments are made. High-frequency data suggest some tapering into the fourth quarter of 2020—for example, in new orders, industrial production, and global trade (Figure 3). The US December employment report also showed the first net decline in nonfarm payrolls since April 2020. Moreover, services output remains subdued and is likely to soften further in the coming months with renewed restrictions to combat rising infections.

The baseline assumes broad vaccine availability in advanced economies and some emerging market economies in summer 2021 and across most countries by the second half of 2022— an accelerated timeline relative to expectations at the time of the previous forecast. Vaccine rollout speed is assumed to vary across economies based on country-specific factors. Moreover, therapies are expected to gradually become more effective and more accessible worldwide over the course of 2021–22. The baseline also assumes the possibility of lockdowns, including to contain transmission of new variants, before vaccines become widely available.

With growing vaccine availability, improved therapies, testing, and tracing, local transmission of the virus is expected to be brought to low levels everywhere by the end of 2022. Some regions and countries will get to low local transmission sooner than others depending on country-specific circumstances.

The sizable fiscal support announced for 2021 in some countries, including most recently in the United States and Japan, together with the unlocking of Next Generation EU funds, will help lift economic activity among advanced economies with favorable spillovers to trading partners. However, as noted in the January 2021 Fiscal Monitor Update, fiscal deficits in most countries are projected to decline in 2021 as revenues rise and expenditures decline automatically with the recovery.

Major central banks are assumed to maintain their current policy rate settings throughout the forecast horizon to the end of 2022. As a result, financial conditions are expected to remain broadly at current levels for advanced economies while gradually improving for emerging market and developing economies. Within this latter group, differentiation between investment-grade sovereigns (who have been able to issue external debt in large amounts in 2020) and high-yield borrowers (many of whom are constrained in their ability to take on additional debt and until recently have not accessed international markets during the pandemic) is expected to subside as the recovery takes hold. As noted in the January 2021 Global Financial Stability Report Update, markets remain upbeat about prospects for 2021, banking on continued policy support.

Reflecting the projected global recovery, oil prices are expected to rise in 2021 just over 20 percent from the low base for 2020, but will still remain well below their average for 2019. Non-oil commodity prices are also expected to increase with those of metals, in particular, projected to accelerate strongly in 2021.

8/ The inflation rate for the euro area is 0.9% in 2021 and 1.2% in 2022, for Japan is -0.1% in 2021 and 0.5% in 2022, and for the United States is 2.1% in 2021 and 2022, respectively.

9/ Excludes Venezuela.

After an estimated 3.5 percent contraction in 2020, the global economy is projected to grow 5.5 percent in 2021 and 4.2 percent in 2022 (Table 1). The estimate for 2020 is 0.9 percentage point higher than projected in the October WEO forecast. This reflects the stronger than-expected recovery on average across regions in the second half of the year. The 2021 growth forecast is revised up 0.3 percentage point, reflecting additional policy support in a few large economies and expectations of a vaccine-powered strengthening of activity later in the year, which outweigh the drag on near-term momentum due to rising infections. The upgrade is particularly large for the advanced economy group, reflecting additional fiscal support—mostly in the United States and Japan—together with expectations of earlier widespread vaccine availability compared to the emerging market and developing economy group.

Consistent with recovery in global activity, global trade volumes are forecast to grow about 8 percent in 2021, before moderating to 6 percent in 2022. Services trade is expected to recover more slowly than merchandise volumes, however, which is consistent with subdued cross-border tourism and business travel until transmission declines everywhere.

Even with the anticipated recovery in 2021–22, output gaps are not expected to close until after 2022. Consistent with persistent negative output gaps, inflation is expected to remain subdued during 2021–22. In advanced economies it is projected to remain generally below central bank targets at 1.5 percent. Among emerging market and developing economies inflation is projected just over 4 percent, which is lower than the historical average of the group.

Aggressive and swift monetary, fiscal, and financial sector policies have helped prevent worse outcomes, as discussed in the October 2020 WEO. In some cases, transfers to households quickly boosted consumer spending—in particular for those with liquidity constraints.¹ Transfers to firms, together with credit guarantees and funding-for-lending programs, have prevented bankruptcies that might otherwise have occurred (but also keeping some unviable firms afloat, which could put a drag on overall productivity in the future). IMF staff analysis of a sample of 13 advanced economies spanning 1990 to the COVID crisis finds that bankruptcies have actually fallen during this recession unlike during past recessions (Figure 6). In part, this decline may also reflect moratoria on bankruptcy filings implemented in some countries. As discussed in the October 2020 WEO, efficient corporate bankruptcy frameworks that apportion losses across investors, creditors, and owners will be central to dealing with any backlogs that may arise. Moreover, special out-of-court restructuring frameworks may need to be strengthened (or established) to expedite processing.

Building on these successes, policies should ensure effective support until a vaccine-powered normalization of activity is underway and limit persistent damage from the deep recession of the past year. Policies to support the economy in the near term should also advance medium-term objectives of placing economies on paths of resilient and equitable growth. Initiatives that raise potential output, protect the vulnerable, ensure participatory growth that benefits all, and accelerate the needed transition to lower carbon dependence can help in this regard.

The main priority remains ensuring that health care systems are adequately resourced everywhere to beat back the pandemic globally. This means securing adequate funding for vaccine purchases and distribution, testing, therapies, personal protective equipment, and investment in health care facilities. Assistance from the international community through know-how and equipment for those with low health-care system capacity remains vital. The international community should also work closely to accelerate access to vaccines for all countries, including by bolstering funding for the COVAX facility, and by ensuring universal distribution of vaccines.

Public health efforts should continue to be reinforced with well-designed economic policies tailored to the stage of the pandemic. Where local transmission remains high, and it is essential to slow down face-to-face interactions, lifelines should be maintained, including transfers to displaced workers and to otherwise viable firms that experience revenue losses. Where local transmission has been low and activity has begun to normalize, lifelines can be gradually rolled back by making their parameters less generous over time (for instance, under short-time work programs, a reduced government share of wages for unworked hours, complemented with hiring subsidies). Moreover, in those countries, broader stimulus should be deployed to support the recovery as needed. Priority areas include education spending to remedy the setback to human capital accumulation, digitalization to boost productivity growth, and green investment to enhance reliance on renewables and increase energy conservation. As noted in the October 2020 WEO, a green investment push coupled with initially moderate but steadily rising carbon prices would yield needed emissions reductions while supporting the recovery from the pandemic recession.

These efforts can be complemented with investment in retraining and reskilling programs to improve reemployment prospects for displaced workers, strengthening social assistance as needed (for example, conditional cash transfers and medical payments for low-income households), and expanding social insurance (relaxing eligibility criteria for unemployment benefits, extending the coverage of paid family and sick leave)—all of which would help address the uneven labor market impact of the crisis and curb rising inequality.

Global Financial Stability Update

A Policy Bridge to the Vaccine

Financial markets have looked beyond the global resurgence of COVID-19 cases.

Announcements and rollout of vaccines have boosted hopes of a global economic recovery in 2021 and pushed risk asset prices higher. The speed of the recovery will depend crucially on production, distribution networks, and access to vaccines. As discussed in the January 2021 *World Economic Outlook (WEO) Update*, continued monetary and fiscal support remain vital to lessen lingering uncertainties, build a bridge to the recovery, and ensure financial stability.

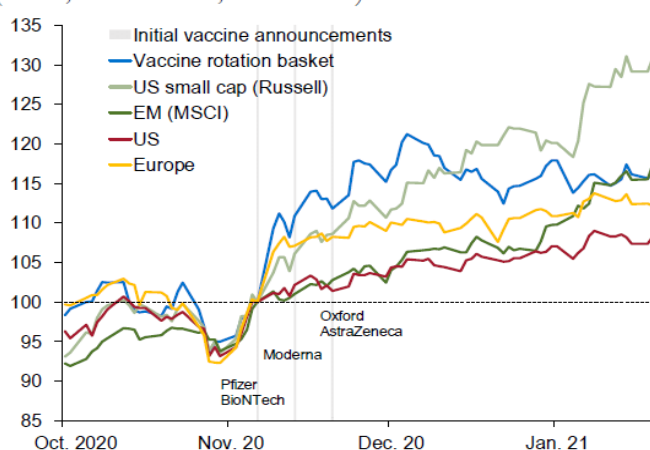

Risks to the baseline could threaten financial stability in some sectors and regions.

A delay in the recovery would require prolonged accommodation, further fueling financial vulnerabilities. Uneven vaccine distribution and asynchronous recovery could imperil capital flows to emerging market economies, especially if advanced economies were to begin to normalize policy, and some countries could face daunting challenges. An asset price correction, should investors suddenly reassess growth prospects or the policy outlook, could interact with elevated vulnerabilities, creating knock-on effects on confidence and jeopardizing macro-financial stability.

Finally, Some Good News

Announcements of earlier-than-anticipated effective COVID-19 vaccines have boosted market sentiment and paved the way for the global economic recovery. Industries such as airlines, hospitality, and consumer services rebounded in late 2020 as investors rotated into these previously battered sectors in search of value (Figure 1). Stock prices of smaller firms, including in clean energy, also benefitted. In advanced economies, investment-grade and high-yield corporate bond spreads have tightened sharply—close to or even below pre-February 2020 levels—while rates have reached record lows, as investors continue to reach for yield. Spreads of emerging market sovereign debt have exhibited a similar compression dynamic.

Financial markets have shrugged off the most recent softening in economic activity.

The surge of COVID-19 infections and associated stringency measures since late 2020 have adversely affected economic activity in many countries, pointing to a possible slowdown in the fourth quarter (see the January 2021 WEO *Update*). Yet, despite persistent uncertainties surrounding the economic outlook, investors appear to remain confident about growth prospects in 2021, betting that continued policy support will offset any possible near-term disappointment. The much discussed disconnect between financial markets and the economy persists. Despite the recent rise in US long-end rates, market participants point to expectations of very low rates over coming years and upward revisions in earnings expectations since the vaccine announcements as justification for the market rally (Figure 2).

Vaccine access is likely to be uneven, and equitable distribution may take time.

Many advanced economies, such as Canada, some European Union countries, the United Kingdom, and the United States, have pre-purchased vaccines. (Sources: Bloomberg Finance L.P.; and IMF staff calculations.)

Ongoing policy support remains necessary until a sustainable recovery takes hold to prevent the pandemic crisis from posing a threat to the global financial system.

The global community should strive for multilateral cooperation in equitable vaccine development and delivery across the world to ensure an even and complete economic recovery. Policymakers should safeguard the progress made so far and build on the rollout of vaccines to return to sustainable growth. A bridge to the point where vaccines are widely available requires preserving

monetary policy accommodation, ensuring liquidity support to households and firms, and keeping financial risks at bay.³ Underdelivering on policy action risks jeopardizing the recovery, and the IMF and other multilateral institutions stand ready to provide further support should further downside risks materialize.

However, policymakers should also be cognizant of the risks of a market correction should investors suddenly reassess growth prospects or the policy outlook. With the recovery still nascent, and inflation still expected to be subdued, monetary policy is anticipated to remain accommodative for years to come. Asset valuations appear to be stretched in several markets. A sense of complacency permeating financial markets as investors seem to bet on a persistent policy backstop and uniform market views raise the risk of a price correction. A sudden sharp tightening of financial conditions from current very low levels—for example, as a result of a persistent increase in long-term interest rates—could be particularly pernicious should such tightening interact with financial vulnerabilities.

Financial stability risks are in check so far, but action is needed to address financial vulnerabilities exposed by the crisis.

Policymakers face an intertemporal policy trade-off between continuing to support the recovery until sustainable growth takes hold and addressing financial vulnerabilities that were evident before the pandemic or have emerged since it began. These include rising corporate debt, fragilities in the nonbank financial institutions sector, increasing sovereign debt, market access challenges for some developing economies, and declining profitability in some banking systems. Employing macroprudential policies to tackle these vulnerabilities is crucial to avoid putting growth at risk in the medium term.

INDIAN ECONOMY OVERVIEW

In October–November 2020, sustained increase in high-frequency indicators and anticipated V-shaped recovery fuelled the optimistic outlook for the third quarter of FY21. Timely announcement of the third instalment of the Atmanirbhar Bharat package—with multisector emphasis on the labour market, industries, social welfare, manufacturing, housing, infrastructure, exports and agriculture—is also an important step towards faster economic recovery and new employment opportunities.

Development in fixed investment, along with a steady rise in private consumption and significant contribution from net exports, contributed to the Indian economy's recovery in the second quarter of FY21. The growth is largely contributed by the agriculture sector, followed by construction and manufacturing, as well as the services sector, primarily through logistics and communication.

Among all key growth generators, the agriculture construction sector has contributed positively to the overall Gross Value Added (GVA) in both quarters of 2020-21. As of November 27, 2020, the total rabi agricultural land stood at 348.24 lakh hectares—4.02% higher than the previous year. The rabi pulse area has increased by 43.3%, which augurs well for production of pulses in 2020-21. 90% of the full reservoir level (FRL) was live storage in major reservoirs used for agricultural benefits, higher than the decadal average of 76%. Increasing sales of tractors indicate healthy production of kharif and prospect of strong rabi sowing. In November 2020, the demand for employment under the Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS) increased by 47.2% YoY. Under the Pradhan Mantri Garib Kalyan Rozgar Yojana, additional distribution of Rs. 10,000 crore (US\$ 1.36 billion) would boost employment development and income in the rural sector. Market indicators are gaining traction as passenger vehicle sales of two and three wheelers surpassed the previous year's record by a strong margin in October 2020. Improvement of November 2020 registrations over the previous months remains promising. Motor vehicle registrations reported a relatively positive YoY growth rate.

In November 2020, Manufacturing Purchasing Managers' Index (PMI) in India stood at 56.3 and remained in the expansionary period consistently. Expansion has been reported in all three large areas of the manufacturing industry, with growth led by consumer goods; this was driven by softening of COVID-19 limitations, along with improving market conditions and demand.

Power consumption increased by 3.5% in November 2020, indicating sustained improvements in business and industrial activities. Since mid-August 2020, the e-way bills produced have improved significantly—recorded

YoY growth of 21.4% in October 2020 and 5.9% in November 2020. The number of inter- and intra-state e-way bills produced in October–November 2020 has also exceeded the previous year's corresponding levels.

A strong leading indicator of revenue collection, supply chain improvements and logistics growth, and persistent improvement in e-way bills produced augurs well for faster economic recovery. This is evident from GST collections recording Rs. 1.05 lakh crore (US\$ 14 billion) in October and November 2020, recording 10% and 1.4% YoY growth, respectively.

In November 2020, rail freight traffic witnessed a 9.0% increase over the corresponding previous- year level, with improvements in key commodity categories—food grains, domestic coal for steel and thermal power plants, pig iron and finished steel, iron-ore for exports, clinker cement and domestic containers. From November 1st to 20th, 2020, gross revenue from railway passenger bookings stood at Rs. 1,038.68 crore (US\$ 141.16 million) due to easing of inter-state movement restrictions, which corresponds to 34% of the previous year levels.

As of November 30, 2020, the Indian basket of crude oil reached US\$ 47.05 a barrel compared with average crude oil prices of US\$ 40.8 a barrel in October 2020, indicating optimistic oil market sentiment with rising economic activity and Covid-19 vaccine prospects.

The re-establishment of economic activity and transition of consumers to digital payments have driven growth for retail financial transactions through the NPCI network. UPI payment transactions in November 2020 reached an all-time high of Rs. 3.91 lakh crore (US\$ 53 billion) in value and 221 crore in volume. Foreign Direct Investment (FDI) remains a significant engine of economic growth and a key source of India's non-debt financing. Total FDI inflow stood at a record high of US\$ 39.93 billion between April 2020 and September 2020, a 10.8% increase over US\$ 36.05 billion FDI in the first six months of 2019-20, supporting India's position as a favoured global investor destination. The Indian equity market has witnessed strong sentiments among investors, with FPI inflow touching a historic high of US\$ 8.5 billion in November 2020. Overall issuance of corporate bonds amounted to Rs. 4.43 lakh crore (US\$ 60 billion) in the first half of FY21, a 25% increase over Rs. 3.54 lakh crore (US\$ 48 billion) in the same period last year. GSecs' narrowing spread indicates the enhanced risk appetite of corporate bonds. In addition, due to monetary easing and liquidity injection by the RBI, the cost of funds moderated for both the government and the corporates, thereby reducing yields in various sections of the debt markets.

Constant declines in the MCLR (Marginal Cost of Funds-based Lending Rate), savings and term deposit rates and enhanced liquidity have boosted monetary policy transmission. Effective Weighted Average Commercial paper yield and deposit certificate rates have dropped below the repo rate and are now also closing at the reverse repo rate. The Emergency Credit Line Guarantee Scheme (ECLGS) continues to facilitate comprehensive disbursement of credit to (Micro, Small & Medium Enterprises).

The central government has taken significant measures to actively support faster economic growth of state governments. The Centre, as part of the AatmaNirbhar Bharat Package, has increased the borrowing cap for states from 3% to 5% of the GSDP for FY21. As of November 22, 2020, state governments have collected Rs. 4.73 lakh crore (US\$ 64 billion) as gross market borrowings in FY21, a 50% increase than the gross borrowings of states for the same period in FY20.

In November 2020, purchases of RBI dollars in the foreign exchange market continue to keep the rupee largely bound at 73.8-74.7 Rs./US\$. As of November 20, 2020, India's foreign exchange reserves stood at US\$ 575.29 billion and reserve money growth increased to 16.2% over 13.1% on October 30, 2020, supported by a pick-up in currency circulation and net foreign exchange reserves.

India's GDP staged a resilient V-shaped recovery in Q2:2020-21 suggesting that the resumption of economic activity has been gathering pace. India's GDP growth rose to (-)7.5 percent YoY in Q2, a sharp rebound from the lockdown-induced decline of (-)23.9 percent in Q1. This is in line with the experience of various economies globally. With the scaling back of lockdowns in May and June, which helped to break the chain of the spread, most economies rebounded from their troughs, posting sharp narrowing in contractions of quarterly growth amid lifting of the containment measures and pick up in business and consumer confidence (Table 1).

On the demand side, consumption and investment accounting for more than 90 percent of overall GDP have staged recoveries. The fixed investment growth sharply rebounded to (-)7.3 percent YoY in Q2 from (-)47.1 percent in Q1 – indicating a pickup of construction projects (Figure 1). Change in stocks has turned positive – probably due to stocking of higher inventories due to anticipated festive season after Q2. Private consumption recovered to (-)11.3 percent in Q2 YoY vs (-)26.7 percent in Q1. Government spending contracted by a (-)22.2 percent YoY in Q2 vs +16.4 percent in Q1 – reflecting the effort to consolidate the fiscal situation given fall in revenues. The enhanced Government spending in Q1, was imperative at that time, given the uncertainty of the lockdown and has supported the recovery in various segments in Q2. Netexports contributed a sizeable 3.4 percentage points (pp) contribution to GDP growth, compared with 5.5 pp in Q1 due to muted growth in imports and lower oil prices.

Spread of COVID relatively manageable though some States show a sharp increase

The number of confirmed cases of COVID-19 globally now exceeds 6.4 crore with more than 14.9 lakh deaths. There has been a resurgence of new cases with daily cases varying between 5- 6 lakh per day, with concentration in United States, Brazil and India. Many European countries responded to the resurgence of fresh cases by imposing partial, shifting and focused lockdowns of ‘hot-spots’. Though concerns over the pandemic remain, the positive news on the vaccine front has raised hopes of a global economic recovery With India reporting a relative decline in daily COVID-19 cases and improved recoveries, India's global position in number of active COVID cases moved from second to seventh after US, France, Italy, Belgium, Brazil and Russia as on 30th November. The festive season led rebound in mobility and consumption contributed to a rise in fresh cases in November. The 7-day average of daily growth in active cases increased in November to -0.7 per cent as on 30th

November as compared to -1.8 per cent as on 31st October (Figure 3). The trend in the daily new cases in India first rose to a peak, then decreased and is now flat — this is similar to the trends seen in the US (witnessing its third wave), the United Kingdom (seems to be near the peak of its second wave), Russia and Italy (both are seeing much stronger second waves). The encouraging parameters, however, were that the recovery rate continues to improve to ~94 per cent as on 30th November vis-à-vis 83.3 percent as on 31st October. Case fatality rate continues to decline to 1.48 per cent as on 31st October as compared to 1.57 per cent as on 30th September.

According to the latest IMF World Economic Outlook, global growth is projected at (-)4.4 percent in 2020, less severe contraction than forecasted in summer. Revision reflected better-than anticipated second quarter GDP outturns, mostly in advanced economies as well as stronger recovery in the third quarter. Economic output is expected to expand by 5.2 percent in 2021, though large uncertainty related to pandemic path and associated economic activity disruption pose downside risk to the growth trajectory (Table 2).

Table 2: Growth projections by IMF, World Economic Outlook- October, 202

Regions/Countries	2020	2021
World	-4.4	5.2
Advanced Economies	-5.8	3.9
United States	-4.3	3.1
Euro Area	-8.3	5.2
Japan	-5.3	2.3
Emerging Market and Developing Economies	-3.3	6.0
India	-10.3	8.8

The GDP contraction in India by 23.9 percent in Q1:2020-21 can be attributed to the stringent lockdown - in alignment with the predictions of global growth in the event of an exogenous unprecedented shock. There were no fundamental or structural factors responsible for the contraction. A V-shaped recovery in Q2: 2020-21 was, therefore, expected once unlocking started. The sustained improvement in high frequency indicators in October and November ignite optimism of an improved performance in Q3:2020-21 (Figure 60). The timely announcement of the third tranche of the Atmanirbhar Bharat package on the eve of Diwali with a multi-sector focus across the labour market, stressed sectors, social welfare, manufacturing, housing, infrastructure, exports and agriculture, is also a significant step towards faster revival of the economy, restoration of lost jobs and creation of new ones.

The downside risk, however, remains the spread of a second wave of COVID-19. However, there is a growing cautious optimism that the steep plunges of April-June quarter of 2020 may not resurface with significant progress in vaccines and contact intensive sectors increasingly adapting to a virtual normal. The need of the hour, as stressed by fresh guidelines of Ministry of Home Affairs, is to follow covid-appropriate behaviour and earnest observation of laid down standard operating guidelines (SOPs). The prospects of a vaccine are encouraging but we need to remain on guard till it is approved and permeates to a large section of the population.

INDIAN TEXTILES INDUSTRY

Introduction

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital-intensive sophisticated mills sector on the other end. The decentralised power looms/ hosiery and knitting sector forms the largest component in the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce wide variety of products suitable for different market segments, both within India and across the world.

The textile and apparel industry plays an important role in the overall social and economic development of the country. The textile and apparel industry contributed 2 per cent in the overall GDP and 11 per cent of total manufacturing GVA in FY20 and provided total direct and indirect employment of about 10.5 crore people. The sector is the second-largest employment generator in the country, next only to agriculture. Most important with a major part of this workforce being women, it plays a vital role in women empowerment and in the overall

social development of the country. The GoI is implementing several schemes cutting across sectors such as the Amended Technology Upgradation Fund Scheme (ATUFS), Scheme for Integrated textiles park (SITP) and a scheme called Samarth. ATUFS, is a revised version of TUFS and has the objective to modernize and upgrade the technology of the Indian textile industry. SITP is for providing world class infrastructure facilities. Of the 56 textile parks which were sanctioned under SITP, 23 have been completed so far. Samarth focusses on capacity building in the textile sector. In addition, other schemes specific to silk, jute, wool, handloom and handicraft sectors are also being implemented.

The Indian textile industry is one of the largest in the world with a large unmatched raw material base and manufacturing strength across the value chain. It is the 2nd largest manufacturer and exporter in the world, after China. The share of textile and clothing in India's total exports stands at a significant 12 % (2018-19). India has a share of 5 % of the global trade in textiles and apparel. The uniqueness of the industry lies in its strength both in the hand-woven sector as well as in the capital intensive mill sector. The mill sector is the second largest in the world. Traditional sectors like handloom, handicrafts and small scale power-loom units are the biggest source of employment for millions of people in rural and semi urban area and also contribute to more than 75% of total textiles production in the country.

The Indian textile Industry has inherent linkage with agriculture and with the culture and traditions of the country making for its versatile spread of products appropriate for both domestic and the export markets. The textile industry contributes to 7% of industry output in value terms, 2% of India's GDP and to 12% of the country's export earnings. The textile industry is one of the largest sources of employment generation in the country with over 45 million people employed directly, and another 6 crore people in allied sectors, including a large number of women and rural population. The sector has perfect alignment with Government's key initiatives of Make in India, Skill India, Women Empowerment and Rural Youth Employment.

India is the sixth-largest exporter of textile and apparel products after China, Germany, Bangladesh, Vietnam, and Italy. India is well known in the global market for many products including cotton yarn, fashion garments, hand-made carpets, etc. The designing capability of this industry is respected worldwide, which has helped the country to build its image as an industrial powerhouse. The sector is, however, vulnerable to several internal and external economic challenges that affect its overall performance.

Market Size

India's textiles industry contributed 7% to the industry output (by value) in 2018-19. The Indian textiles and apparel industry contributed 2% to the GDP, 12% to export earnings and held 5% of the global trade in textiles and apparel in 2018-19.

Textiles industry has around 4.5 crore employed workers including 35.22 lakh handloom workers across the country.

Cotton production is expected to reach 36.0 million sales in FY21.

The domestic textiles and apparel market stood at an estimated US\$ 100 billion in FY19. The production of raw cotton in India is estimated to have reached 35.4 million bales in FY20. During FY19, production of fibre in India stood at 1.44 million tonnes (MT) and reached 1.60 MT in FY20 (till January 2020), while that for yarn, the production stood at 4,762 million kgs during same period.

Investment

The textiles sector has witnessed a spurt in investment during the last five years. The industry (including dyed and printed) attracted Foreign Direct Investment (FDI) worth US\$ 3.46 billion from April 2000 to September 2020.

(Source: <https://www.ibef.org/industry/textiles.aspx>)

Government Initiatives

Indian government has come up with several export promotion policies for the textiles sector. It has also allowed 100% FDI in the sector under the automatic route.

Initiatives taken by Government of India are:

- Defence Research and Development Organisation (DRDO) is helping the Indian textile industry to produce yarns and eliminate dependence on import of Chinese and other foreign clothing for military uniforms.
- In October 2020, the Cabinet Committee on Economic Affairs chaired by Mr. Narendra Modi approved mandatory packaging of 100% food grains and 20% sugar in jute bags. Under the Jute Packaging Materials (Compulsory Use in Packing Commodities) Act, 1987, the government is required to consider and provide for the compulsory use of jute packaging materials for supply.
- Government launched production linked incentive scheme to provide incentives for manufacture and export of specific textile products made of man-made fibre.
- On September 2, 2020, the Union Cabinet approved signing an MOU between textile committee, India and M/s Nissenken Quality Evaluation Centre, Japan, for improving quality and testing Indian textiles and clothing for the Japanese market. This India-Japan pact on cooperation in textiles will facilitate Indian exporters to meet the requirements of Japanese importers as per the latter's technical regulations.
- Under Union Budget 2020-21, a National Technical Textiles Mission is proposed for a period from 2020-21 to 2023-24 at an estimated outlay of Rs. 1,480 crore (US\$ 211.76 million).
- In 2020, New Textiles Policy 2020 is expected to be released by the Ministry of Textiles.
- The Directorate General of Foreign Trade (DGFT) has revised rates for incentives under the Merchandise Exports from India Scheme (MEIS) for two subsectors of Textiles Industry - readymade garments and made-ups - from 2% to 4%.
- The Government of India has taken several measures including Amended Technology Up-gradation Fund Scheme (A-TUFS), estimated to create employment for 35 lakh people and enable investment worth Rs. 95,000 crore (US\$ 14.17 billion) by 2022.
- Integrated Wool Development Programme (IWDP) was approved by Government of India to provide support to the wool sector, starting from wool rearer to end consumer, with an aim to enhance quality and increase production during 2017-18 and 2019-20.

(Source: <https://www.ibef.org/industry/textiles.aspx>)

Achievements

Following are the achievements of the Government in the past four years:

- I-ATUFS, a web-based claims monitoring, and tracking mechanism was launched on April 21, 2016. 381 new block level clusters were sanctioned.
- Under the Scheme for Integrated Textile Parks (SITP), 59 textile parks were sanctioned, out of which, 22 have been completed.
- Employment increased to 45 million in FY19 from 8.03 in FY15.
- Exports of readymade garments (of all textiles) was worth US\$ 1.04 billion as of November 2020.

Our Company commenced its spinning operation in our manufacturing unit situated at Dindigul in the year 1995. During the year 2005, we expanded our spinning operations by setting up an additional manufacturing unit with an installed capacity of 1,14,000 spindles for manufacturing combed knitted yarn and compact yarn for weaving. The spinning units are equipped with modern spinning machinery purchased from LMW Coimbatore, Rieter Switzerland, Schlafhorst Germany, Trutzchler Germany, etc. and also contains a full range of testing equipment’s form Uster Switzerland. The weaving unit, established in the year 2005 specializes in manufacturing of grey fabric which is the primary raw material for woven garment units and the home textile products. The facility is equipped with Sulzer wider width jumbo looms and Sulzer Airjet looms which enable manufacturing of ultra-fine count fabric in narrow or wider width. The knitting unit established in 2011, manufactures single jersey, interlock and rib fabrics in diameter ranging from 20” to 36”. In 2013, our Company acquired its fabric processing unit. The processing unit provides quality solutions for textile dyeing, printing as well as finishing needs of our Company, our Joint Venture and Subsidiary, Young Brand Apparel Private Limited. It also enables us to carry out job work activities to cater to the finishing requirements of third-party garment units. The said processing unit is equipped with latest facilities such as effluent treatment including RO plant, nano filtration, evaporator, etc., with zero discharge of effluents. Our garment manufacturing facility is equipped with efficient equipment and robust systems for manufacturing inner and outer wear garments. The home textile facility produces wide range of home textile products viz., bed linens, bed sheets, blankets, mattress covers, hand towels, to name a few. The wind power generated is captively consumed by our spinning units and thereby it aids in meeting our significant power requirement.

Since incorporation, it was our Company’s vision and focus to manufacture and supply superior quality products to our customers, which has enabled us to expand our business operations globally. We have set up a quality control facility (“**Quality Control Facility**”) in all our manufacturing units which carries out all the required tests on the materials received including raw materials which are used in the manufacturing process and also on the final products. Our Quality Control Facility also carries out tests on all the stages of our manufacturing processes to ensure that the quality is built through the process.

(b) Principles of consolidation and equity accounting

(i) Subsidiaries

Subsidiaries are all entities (including structured entities) over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date that control ceases.

The acquisition method of accounting is used to account for business combinations by the group.

The group combines the financial statements of the parent and its subsidiaries line by line adding together like items of assets, liabilities, equity, income and expenses. Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated statement of profit and loss, consolidated statement of changes in equity and balance sheet respectively.

The carrying amount of equity accounted investments are tested for impairment.

The consolidated Ind AS financial statements of the Group include subsidiaries/joint ventures which are incorporated in India in the table below:

Name of the entity	31/03/2020	31/03/2019	31/03/2018

2.2 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The board of directors of the Company assesses the financial performance and position of the Company, and makes strategic decisions. The board of directors, which has been identified as being the chief operating decision maker.

2.3 Use of estimates

In the application of the Company's accounting policies, the directors of the Company are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that may have a risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

a) Impairment of investments in subsidiaries

The Company reviews its carrying value of investments in subsidiaries at cost, annually, or more frequently when there is an indication for impairment. If the recoverable amount is less than its carrying amount, the impairment loss is accounted for.

b) Useful lives of property, plant and equipment

The Company reviews the useful life of property, plant and equipment at the end of each reporting period. This assessment may result in change in the depreciation expense in future periods.

c) Deferred tax assets

The carrying amount of deferred tax asset is reviewed at each reporting period and is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

d) Employee benefits

The cost of defined benefit plans are determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty.

e) Impact of Covid-19

The outbreak of COVID-19 pandemic and the resulting lockdown enforced from March 23, 2020 has affected the Company's regular operations. The Company has considered the possible effects that may result from the pandemic relating to COVID-19 on the carrying amounts of Property, plant and equipment, Inventories, Receivables and Other assets. In developing the assumptions relating to the possible future uncertainties in the global economic conditions because of this pandemic, the Company, as at the date of approval of these financial results has used internal and external sources on the expected future performance of the Company. The Company has evaluated its liquidity position, recoverability and based on current estimates expects the carrying amount of these assets will be recovered. The impact of COVID-19 on the Company's financial results may differ from that estimated as at the date of approval of these financial results.

2.4	<p>Inventories Inventories are valued at lower of cost and net realisable value. Cost of raw materials, Packing materials, Stores and Spares and consumables are valued at cost on First-In-First-Out (FIFO) basis. Value of finished goods and work-in-progress are determined on First-In-First-Out (FIFO) basis and include appropriate share of overheads.</p>
2.5	<p>Cash and cash equivalents Cash and cash equivalents comprise cash on hand and demand deposits with banks other than deposits pledged with government authorities and margin money deposits. Cash and cash equivalent in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to insignificant risk of changes in value. Bank borrowings are generally considered to be financing activities. However, where bank overdrafts which are repayable on demand form an integral part of an entity's cash management, bank overdrafts are included as a component of cash and cash equivalents. A characteristic of such banking arrangements is that the bank balance often fluctuates from being positive to overdrawn.</p>
2.6	<p>Cash flow statement Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.</p>
2.7	<p>Taxes on income</p> <p>a) Current tax The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the standalone statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted and are applicable as at the end of the reporting period. In the absence of adequate taxable profits, the Company is required to pay Minimum Alternate Tax (MAT) on the book profits, as adjusted for certain provisions.</p> <p>b) Deferred tax Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. MAT paid in accordance with the tax laws, if any, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal tax. Accordingly, MAT is recognised as a deferred tax asset in the Balance sheet when it is highly probable that future economic benefit associated with it will flow to the Company. The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.</p> <p>c) Current and deferred tax for the year Current and deferred tax are recognised in the Statement of profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.</p>
2.8	<p>a) Property, plant and equipment The cost of property, plant and equipment comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, including relevant borrowing costs for qualifying assets and any expected costs of decommissioning. Expenditure incurred after the property, plant and equipment have been put into operation, such as repairs and maintenance, are charged to the Statement of Profit and Loss in the period in which the costs are incurred. Major shut-down and overhaul expenditure is capitalised as the activities undertaken improves the economic benefits expected to arise from the asset. An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in Statement of Profit and Loss.</p>

S M P B

Property, plant and equipment except freehold land held for use in the production, supply or administrative purposes, are stated in the balance sheet at cost less accumulated depreciation and accumulated impairment losses, if any.
Freehold land and leasehold land where the lease is convertible to freehold land under lease agreements at future dates at no additional cost, are not depreciated.

b) Capital work-in-progress

Projects under which assets are not ready for their intended use and other capital work-in-progress are carried at cost, comprising direct cost and related incidental expenses.

Depreciation commences when the assets are ready for their intended use. Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value. Depreciation is recognized so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013.

The Company reviews the residual value, useful lives and depreciation method annually and, if expectations differ from previous estimates, the change is accounted for as a change in accounting estimate on a prospective basis.

2.9

Leases

Ind AS 116 - Leases, has become applicable effective annual reporting period beginning April 1, 2019. The Company has adopted the standard beginning April 1, 2019, using the modified retrospective approach for transition. Accordingly, the Company has not restated the comparative information, instead the cumulative effect of initially applying the standard has been recognised as an adjustment to the opening balance of retained earnings as on April 1, 2019.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, company's incremental borrowing rate. Generally, the company uses its incremental borrowing rate as the discount rate.

2.10

Revenue recognition

Effective from 1st April 2018 the Company has adopted Ind AS 115, Revenue from Contracts with Customers. The company has adopted full retrospective adoption in which standard is applicable to all the periods presented, including comparative period. The revenue is recognised as follows :

Revenue is recognised when control of the goods and services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment. The Company is the principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements as it has pricing latitude and is also exposed to inventory and credit risks. However, Goods and Services tax (GST) are not received by the Company on its own account. Rather, it is tax collected on value added to the commodity by the seller on behalf of the government. Accordingly, it is excluded from revenue.

(i) Sale of goods

Revenue from sale of goods is recognised when control of the goods is transferred to the Customers. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates.

(ii) Time and material:

Revenue from time and material contracts are recognised as and when services are rendered to the customer. These are based on the efforts spent and rates agreed with the customer. Revenue from the end of the last invoicing to the reporting date is recognised as unbilled revenue.

(iii) Dividend and interest income

Dividend income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably).

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

(iv) Other operating revenue:

Income incidental to exports such as duty drawback, Merchandise Exports from India Scheme (MEIS), income from import entitlement and premium on sale of such entitlement are recognised when there is a reasonability of collection.

2.11	<p>Employee benefits Employee benefits include provident fund, employee state insurance, gratuity fund and compensated absences.</p> <p>a. Retirement benefit costs and termination benefits Payments to defined contribution Retirement Benefit Plans are recognised as an expense when employees have rendered service entitling them to the contributions. For defined benefit Retirement Benefit Plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and is not reclassified to profit or loss. Past service cost is recognised in profit or loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset.</p> <p>b. Defined benefit costs are categorised as follows -service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements); -net interest expense or income; and -remeasurement For defined benefit plan, in the form of gratuity fund, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each Balance Sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the scheme. The gratuity fund is maintained with Life Insurance Corporation of India. The Company presents the first two components of defined benefit costs in profit or loss in the line item 'Employee benefits expenses'. Curtailment gains and losses are accounted for as past service costs. The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company's defined benefit plan. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans. A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognises any related restructuring costs.</p> <p>c. Short-term and other long term employee benefits A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service. Liabilities recognised in respect of short term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service. Liabilities recognised in respect of other long term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.</p>
2.12	<p>Foreign currency transactions and translations</p> <p>i) Functional and presentation currency Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates ('the functional currency'). The financial statements are presented in Indian rupee (INR), which is the Company's functional and presentation currency.</p> <p>ii) Transactions and balances Transactions in foreign currency are translated into the respective functional currencies using the exchange rates prevailing at the dates of the respective transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at the exchange rates prevailing at reporting date of monetary assets and liabilities denominated in foreign currencies are recognized in the statement of profit and loss and reported within foreign exchange gains/ (losses). Also refer note 2.1(1). Non-monetary assets and liabilities measured in terms of historical cost in foreign currencies are not retranslated. Foreign currency gains and losses are reported on a net basis. This includes changes in the fair value of foreign exchange derivative instruments, which are accounted at fair value through profit or loss.</p>
2.13	<p>Borrowings and borrowing cost Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest rate method. Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.</p>

Handwritten signatures and initials.

	<p>Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.</p> <p>Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. All other borrowing costs are recognised in statement of profit and loss in the period in which they are incurred.</p>
2.14	<p>Earnings per share</p> <p>Basic earnings per share is computed by dividing the profit / (loss) after tax by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.</p>
2.15	<p>Provisions and contingencies</p> <p>A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes.</p>
2.16	<p>Financial Instruments</p> <p>All financial instruments are recognised initially at fair value. Transaction costs that are attributable to the acquisition of the financial asset (other than financial assets recorded at fair value through profit or loss) are included in the fair value of the financial assets. Purchase or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trade) are recognised on trade date. While, financial liabilities like loans and borrowings and payables are recognised net of directly attributable transaction costs.</p> <p>For the purpose of subsequent measurement, financial instruments of the Company are classified in the following categories: non-derivative financial assets comprising amortised cost, equity instruments at FVTOCI or fair value through profit and loss account (FVTPL) and financial liabilities at amortised cost or FVTPL.</p> <p>The classification of financial instruments depends on the objective of the business model for which it is held. Management determines the classification of its financial instruments at initial recognition.</p> <p>a) Non-derivative financial assets</p> <p>i) Financial assets at amortised cost</p> <p>A financial asset shall be measured at amortised cost if both of the following conditions are met:</p> <p>a) the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and</p> <p>b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.</p> <p>They are presented as current assets, except for those maturing later than 12 months after the reporting date which are presented as non-current assets. Financial assets are measured initially at fair value plus transaction costs and subsequently carried at amortized cost using the effective interest method, less any impairment loss.</p> <p>The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or where appropriate, a shorter period, to the gross carrying amount on initial recognition.</p> <p>Financial assets at amortised cost are represented by trade receivables, security deposits, cash and cash equivalents, employee and other advances and eligible current and non-current assets.</p> <p>Income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL. Interest income is recognised in profit or loss and is included in the "Other Income" line item.</p> <p>ii) Equity Instruments at FVTOCI</p> <p>All equity instruments are measured at fair value. Equity instruments held for trading is classified as FVTPL. For all other equity instruments, the Company may make an irrevocable election to present subsequent changes in the fair value in OCI. The Company makes such election on an instrument-by-instrument basis.</p> <p>If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividend are recognised in OCI which is not subsequently recycled to statement of profit and loss.</p>

iii) Financial assets at FVTPL

FVTPL is a residual category for financial assets. Any financial asset which does not meet the criteria for categorization as at amortised cost or as FVTOCI, is classified as FVTPL.

In addition, the Company may elect to designate the financial asset, which otherwise meets amortised cost or FVOCI criteria, as FVTPL if doing so eliminates or significantly reduces a measurement or recognition inconsistency.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the 'Other income' line item. Dividend on financial assets at FVTPL is recognised when the Company's right to receive the dividends is established, it is probable that the economic benefits associated with the dividend will flow to the entity, the dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably.

iv) Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

On derecognition of a financial asset other than in its entirety (e.g. when the Company retains an option to repurchase part of a transferred asset), the Company allocates the previous carrying amount of the financial asset between the part it continues to recognise under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

b) Non-derivative financial liabilities

i) Financial liabilities at amortised cost

Financial liabilities at amortised cost represented by borrowings, trade and other payables are initially recognized at fair value, and subsequently carried at amortized cost using the effective interest rate method.

ii) Financial liabilities at FVTPL

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'Finance costs' line item. The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in Statement of Profit and Loss.

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments and are recognised in the statement of profit and loss. The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognised in profit or loss.

iii) Derecognition of non-derivative financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

2.17	<p>Impairment</p> <p>a) Financial Assets</p> <p>In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss. The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivable. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.</p> <p>Lifetime ECLs are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12-months after the reporting date.</p> <p>ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e. all shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:</p> <p>i) All contractual terms of the financial instrument (including prepayment, extension etc.) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.</p> <p>ii) Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.</p> <p>As practical expedient, the Company uses a provision matrix to determine impairment loss on portfolio of its trade receivable. The provision matrix is based on its historically observed default rates over the expected life of the trade receivable and is adjusted for forward-looking estimates. At every reporting date, the historically observed default rates are updated and changes in forward-looking estimates are analysed.</p> <p>ECL impairment loss allowance (or reversal) recognised during the year is recognised as income/expense in the statement of profit and loss. The balance sheet presentation for various financial instruments is described below:</p> <p>Financial assets measured at amortised cost, contractual revenue receivable: ECL is presented as an allowance, i.e. as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write off criteria, the Company does not reduce impairment allowance from the gross carrying amount.</p> <p>b) Non-financial assets</p> <p>The Company assesses at each reporting date whether there is any objective evidence that a non financial asset or a group of non financial assets is impaired. If any such indication exists, the Company estimates the amount of impairment loss.</p> <p>An impairment loss is calculated as the difference between an asset's carrying amount and recoverable amount. Losses are recognised in profit or loss and reflected in an allowance account. When the Company considers that there are no realistic prospects of recovery of the asset, the relevant amounts are written off. If the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, then the previously recognised impairment loss is reversed through profit or loss.</p> <p>The recoverable amount of an asset or cash-generating unit (as defined below) is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit").</p>
2.18	<p>Government grants</p> <p>Grants from the government are recognised when there is reasonable assurance that:</p> <p>(i) the Company will comply with the conditions attached to them; and</p> <p>(ii) the grant will be received.</p> <p>Government grants related to revenue are recognised on a systematic basis in the statement of profit and loss over the periods necessary to match them with the related costs which they are intended to compensate. Such grants are deducted in reporting the related expense. When the grant relates to an asset, it is recognized as income over the expected useful life of the asset.</p> <p>Where the Company receives non-monetary grants, the asset is accounted for on the basis of its acquisition cost. In case a non-monetary asset is given free of cost it is recognised at a fair value. When loan or similar assistance are provided by government or related institutions, with an interest rate below the current applicable market rate, the effect of this favourable interest is recognized as government rate. The loan or assistance is initially recognized and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received.</p>
2.19	<p>Operating cycle</p> <p>Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.</p>

Note	Particulars		
25	Employee benefit plans		
25.1.a	Defined contribution plans - provident fund and employee state insurance		
	The Company makes Provident Fund and Employee state insurance scheme contributions to defined contribution plans for qualifying employees. Under the Schemes, the Company is required to contribute a specified percentage of the payroll costs to fund the benefits. The Company recognised the following contributions in the restated statement of profit and loss:		
		For the year ended	
	Particulars	31/03/2020	31/03/2019
	Provident fund	435.64	359.89
	Employee state insurance	87.81	74.76
25.1.b	Defined benefit plan - gratuity		
	In accordance with applicable Indian laws, the Company provides for gratuity, a defined benefit retirement plan (Gratuity plan). The Gratuity plan provides a lump sum payment to vested employees, at retirement or termination of employment, an amount based on the respective employee's last drawn eligible salary and the years of employment with the Company. The Company provides the gratuity benefit through annual contributions to a fund managed by the Insurer included as part of 'Contribution to provident and other funds' in Note 20 Employee benefits expense. Under this plan, the settlement obligation remains with the Company.		
	Description of Risk Exposures		
	Valuations are performed on certain basic set of pre-determined assumptions and other regulatory framework which may vary over time. Thus, the Company is exposed to various risks in providing the above gratuity benefit which are as follows:		
	a) Interest Rate Risk: The plan exposes the Company to the risk of fall in interest rates. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability (as shown in financial statements).		
	b) Investment Risk: The probability or likelihood of occurrence of losses relative to the expected return on any particular investment.		
	c) Salary Escalation Risk: The present value of the defined benefit plan is calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.		
	d) Demographic Risk: The Company has used certain mortality and attrition assumptions in valuation of the liability. The Company is exposed to the risk of actual experience turning out to be worse compared to the assumption.		
	e) Liquidity Risk: This is the risk that the Company is not able to meet the short-term gratuity payouts. This may arise due to non-availability of enough cash/cashequivalent to meet the liabilities or holding of illiquid assets not being sold in time.		
	In respect of the plan in India, the most recent actuarial valuation of the plan assets and the present value of the defined benefit obligation were carried out as at each of the year/period end by Fellow of the Institute of Actuaries of India. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the projected unit credit method.

Note	Particulars			
Sensitivity Analysis	Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below:			
	Gratuity Plan	31/03/2020	31/03/2019	31/03/2018
	Estimate value of obligation if discount rate is taken 1% higher	685.05	667.12	493.17
	Estimate value of obligation if discount rate is taken 1% lower	816.16	791.78	586.24
	Estimate value of obligation if salary growth rate is taken 1% higher	814.65	791.03	583.72
	Estimate value of obligation if salary growth rate is taken 1% lower	685.55	667.10	494.56
	Estimate value of obligation if attrition rate is taken 1% higher	737.75	468.68	381.50
	Estimate value of obligation if attrition rate is taken 1% lower	752.86	452.17	377.29
These sensitivities have been calculated to show the movement in defined benefit obligation in isolation and assuming there are no other changes in market conditions at the accounting date. There have been no changes from the previous periods in the methods and assumptions.				
Maturity profile of defined benefit obligation:				
	Maturity profile, if it ensues	31/03/2020	31/03/2019	31/03/2018
	1	135.40	136.64	40.89
	2	52.68	61.81	42.41
	3	46.85	45.55	38.36
	4	31.22	51.58	31.58
	5	40.38	65.87	73.54
	Above 5	148.08	132.57	100.26
Asset Liability Matching Strategies				
The Company has purchased insurance policy, which is basically a year-on-year cash accumulation plan in which the interest rate is declared on yearly basis and is guaranteed for a period of one year. The insurance Company, as part of the policy rules, makes payment of all gratuity liability occurring during the year (subject to sufficiency of funds under the policy). The policy, thus, mitigates the liquidity risk. However, being a cash accumulation plan, the duration of assets is shorter compared to the duration of liabilities. Thus, the Company is exposed to movement in interest rate (in particular, the significant fall in interest rates, which should result in a increase in liability without corresponding increase in the asset).

BANNARI AMMAN SPINNING MILLS LIMITED**Restated Consolidated Financial Information**

Notes to the Restated consolidated financial information**31 Leases**

On March 30, 2019, the Ministry of Corporate Affairs had notified Ind AS 116, Leases, replacing the existing leases standard, Ind AS 17, Leases, and related interpretations. The new lease standard sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract i.e., the lessee and the lessor. Ind AS 116 introduces a single lessee accounting model and requires a lessee to recognize assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. Currently, operating lease expenses are charged to the statement of profit and loss. The Standard also contains enhanced disclosure requirements for lessees. Ind AS 116 substantially carries forward the lessor accounting requirements in Ind AS 17.

The standard permits two possible methods of transition:

Full retrospective : Retrospectively to each prior period presented applying Ind AS 8 Accounting Policies, Changes in Accounting Estimates and Errors.

Modified retrospective : Retrospectively, with the cumulative effect of initially applying the Standard recognized at the date of initial application.

The Group has entered into leasing arrangements in respect of residential/office premise. The leasing arrangements, which are generally cancellable, have lease periods ranging between 11 and 60 months. They are generally renewable by mutual consent on mutually agreeable terms. The operating leases are cancellable by lessor/lessee with notice period up to three months.

The following is the summary of practical expedients elected by the Group on the initial application:

Applied the practical expedient to grandfather the assessment of which transactions are leases. Accordingly, Ind AS 116 is applied only to contracts that were previously identified as leases under Ind AS 17.

In respect of those leases classified as finance leases applying Ind AS 17, at the date of initial application, the Group has elected to recognise the right-of-use asset and the lease liability at the carrying amount of the lease asset and lease liability immediately before that date measured applying Ind AS 17.

Applied a single discount rate to a portfolio of leases of similar assets in similar economic environment with a similar end date.

Applied the exemption not to recognize right-of-use assets and liabilities for leases with less than 12 months of lease term on the date of initial application.

Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application.

For the purpose of this restated consolidated financial information, proforma transition date for Ind AS 116 has been considered as 1 Apr 17. Accordingly adjustment on account of first time adoption Ind AS 116 has been adjusted in the opening retained earnings as at 1 Apr 17. Refer note 10.3.

The Group's weighted average incremental borrowing rate applied to lease liabilities recognised in the balance sheet at the date of initial application i.e 1 April 2017 is 11.50% per annum.

 Notes to the Restated consolidated financial information

The following methods and assumptions were used to estimate the fair values:

i) Long-term fixed-rate receivables/borrowings are evaluated by the Company based on parameters such as interest rates, specific country risk factors, individual creditworthiness of the customer and the risk characteristics of the financed project. Based on this evaluation, allowances are taken into account for the expected losses of these receivables.

ii) Fair values of the Company's interest-bearing borrowings and loans are determined by using DCF method using discount rate that reflects the issuer's borrowing rate as at the end of the reporting period. The own non-performance risk as at March 31, 2020 was assessed to be insignificant.

iii) The fair values of the unquoted equity shares have been estimated using a discounted cash flow model. The valuation requires management to make certain assumptions about the model inputs, including forecast cash flows, discount rate, credit risk and volatility, the probabilities of the various estimates within the range can be reasonably assessed and are used in management's estimate of fair value for these unquoted equity investments.

33 Fair value hierarchy

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The following table presents the fair value measurement hierarchy of financial assets and liabilities measured at fair value on recurring basis as at:

34 Financial risk management

The Company's principal financial liabilities, comprise loans and borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the company's operations and to provide guarantees to support its operations. The Company's principal financial assets include loans, trade and other receivables, and cash and short-term deposits that derive directly from its operations.

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk, foreign currency risk and interest rate risk. The Company's primary focus is to foresee the unpredictability of financial markets and seek to minimize potential adverse effects on its financial performance. The primary market risk to the company is foreign exchange risk. The Company uses foreign currency borrowings to mitigate foreign exchange related risk exposures.

The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below:

1) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investment securities. Credit risk arises from cash held with banks and financial institutions, as well as credit exposure to clients, including outstanding accounts receivable. The maximum exposure to credit risk is equal to the carrying value of the financial assets. The objective of managing counterparty credit risk is to prevent losses in financial assets. The Company assesses the credit quality of the counterparties, taking into account their financial position, past experience and other factors.

2) Trade and other receivables

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the customer, including the default risk of the industry and country in which the customer operates, also has an influence on credit risk assessment.

The following table gives details in respect of percentage of revenues generated from top customer and top 5 customers:

Particulars	31/03/2020	31/03/2019	31/03/2018
Revenue from top customer	7,830.82	9,623.85	3,089.35
Revenue from top 5 customers	22,954.83	20,544.73	9,732.92

Particulars	31/03/2020	31/03/2019	31/03/2018
Number of customers accounted for:			
More than 10% of revenue	2	2	8
More than 10% of receivables	3	2	4

3) Investments

The Company limits its exposure to credit risk by generally investing in liquid securities and only with counterparties that have a good credit rating. The company does not expect any losses from non-performance by these counter-parties, and does not have any significant concentration of exposures to specific industry sectors.

4) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company manages its liquidity risk through credit limits with banks.

The Company's corporate treasury department is responsible for liquidity, funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management.

The working capital position of the Company is given below:

Particulars	31/03/2020	31/03/2019	31/03/2018
Cash and cash equivalents	3,424.40	1,060.15	1,662.29

5) Foreign currency risk

The Company's exchange risk arises from its foreign currency revenues and expenses, (primarily in U.S. dollars, British pound sterling and Euros) and foreign currency borrowings (primarily in U.S. dollars, British pound sterling and Euros). A significant portion of the Company's revenues are in these foreign currencies, while a significant portion of its costs are in Indian rupees. As a result, if the value of the Indian rupee appreciates relative to these foreign currencies, the Company's revenues measured in rupees may decrease. The exchange rate between the Indian rupee and these foreign currencies has changed substantially in recent periods and may continue to fluctuate substantially in the future. The Company's management meets on a periodic basis to formulate the strategy for foreign currency risk management.

Consequently, the management of the Company believes that the borrowings in foreign currency and its assets in foreign currency shall mitigate the foreign currency risk mutually to some extent.

The following table presents foreign currency risk from non-derivative financial instruments as of:

Foreign currency sensitivity analysis

The Company is mainly exposed to the currency USD on account of significant outstanding trade receivables, borrowings and trade payables in USD.

The following table details the Company's sensitivity to a 5% increase and decrease in INR against the USD. 5% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 5% change in foreign currency rates. A positive number below indicates an increase in profit or equity where the INR strengthens 5% against the relevant currency. For a 5% weakening of the INR against the relevant currency, there would be a comparable impact on the profit or equity, and the balances below would be negative.

Particulars	31/03/2020	31/03/2019	31/03/2018
Impact on profit or (loss) for the period/year	253.10	280.19	475.96

For a 5% weakening of the INR against the relevant currency, there would be equivalent amount of impact on the profit as mentioned in the above table.

6) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's debt obligations with floating interest rates and investments.

Interest rate sensitivity analysis

If interest rates had been 1% higher and all other variables were held constant, the company's profit for the year ended would have impacted in the following manner:

Particulars	31/03/2020	31/03/2019	31/03/2018
Increase / (decrease) in the profit for the year	(615.00)	(696.63)	127.90

If interest rates were 1% lower, the company's profit would have increased by the equivalent amount as shown in the above table.

7) Capital management

The Company's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The Company monitors the return on capital. The Company's objective when managing capital is to maintain an optimal structure so as to maximize shareholder value.

The capital structure is as follows:

Particulars	31/03/2020	31/03/2019	31/03/2018
Total equity attributable to the equity share holders of the company	34,718.94	34,344.72	32,350.22
As percentage of total capital	34%	32%	32%
Current borrowings	42,010.52	44,377.78	39,491.56

Total borrowings	67,696.15	72,516.45	70,214.70
As a percentage of total capital	66%	68%	68%
Total capital (borrowings and equity)	102,415.09	106,861.17	102,564.92

The Company is predominantly debt financed which is evident from the capital structure table.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“**DPIIT**”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2017 (“**FDI Circular 2017**”), which, with effect from August 28, 2017, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on August 28, 2017. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2017 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails. The Consolidated FDI Policy, issued by the DIPP, consolidates the policy framework in place as on August 27, 2017, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore the Consolidated FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the existing policy of the Government of India, erstwhile OCBs cannot participate in this Issue.
